## Leveraging Backward Integration for Sustainable Growth

Sambhv Steel Tubes Limited (SSTL), established in 2017 and headquartered in Raipur, Chhattisgarh, is a leading manufacturer of electric resistance welded (ERW) steel pipes and structural tubes. The company operates a fully backward-integrated manufacturing facility located in Sarora (Tilda), Raipur, which enables it to efficiently manage the entire production process, including the in-house production of intermediate products like sponge iron, blooms/slabs, and hot-rolled coils. This integration allows for stringent quality control and cost efficiency. SSTL's product portfolio includes ERW black pipes and tubes, galvanized iron (GI) pipes, pre-galvanized GP pipes, and stainless-steel coils, with an annual production capacity of approximately 1.7 million metric tons. The company serves diverse sectors such as infrastructure, agriculture, automotive, and telecommunications, with a distribution network spanning 15 states and one union territory in India.

Post-IPO, SSTL plans to expand its manufacturing capacity by establishing a new facility in Kesda, Chhattisgarh. The facility aims to add an installed capacity of ~1.20 million metric tons per annum of finished products in three phases, with Phase 1 expected to be commissioned by FY27.

The company also focuses on enhancing its digital infrastructure and operational efficiency through ERP systems and ISO-compliant energy management practices. These strategic initiatives are designed to strengthen SSTL's market position and capitalize on the burgeoning demand in India's infrastructure and industrial sectors. Additionally, the proceeds from the IPO will primarily be used to reduce debt, lowering interest costs and further strengthening the balance sheet.
