FORWARD-LOOKING STATEMENTS

This Prospectus contains certain “forward-looking statements”. These forward looking statements generally can be identified by words or phrases such as “aim”, “anticipate”, “believe”, “expect”, “estimate”, “intend”, “objective”, “plan”, “project”, “shall”, “will”, “will continue”, “will pursue” or other words or phrases of similar import. Similarly, statements that describe our objectives, plans or goals are also forward-looking statements for example, under “Objects of the Issue”, “Growth Strategy”. These forward-looking statements may include statements that address activities, events or developments that we anticipate may occur in the future.

Although we believe the expectations expressed in the forward-looking statements are based on reasonable assumptions within the bounds of our knowledge of our business, a number of risks, uncertainties and factors, domestically and internationally, could cause actual results to differ materially from those expressed in any forward-looking statement(s), whether oral or written, made by us or on our behalf.

Our business is subject to risks, uncertainties and factors beyond our control. Any one, or a combination, of these could materially affect our financial performance. These risks, uncertainties and factors include:

- economic changes nationally or in our local markets;
- volatility of mortgage interest rates and inflation;
- increased competition;
- shortages or increased prices of skilled labor or raw materials used in our business;
- the cost implications of disputes arising out of change orders;
- any delays in reacting to changing customer preference;
- terrorist acts and other acts of war;
- delays or difficulties in implementing initiatives to reduce our production and overhead cost structure;
- delays in construction resulting from adverse weather conditions;
- potential delays or increased costs in obtaining necessary permits/approvals as a result of changes to, or complying with, laws, regulations or governmental policies and possible penalties for failure to comply with such laws, regulations and governmental policies;
- changes in accounting policies, standards, guidelines or principles, as may be adopted by regulatory agencies;
- other factors over which we have little or no control.

Forward-looking statements that we make or that are made by others on our behalf are based on knowledge of our business and the environment in which we operate. Due to risks, uncertainties and factors listed above and other similar factors, actual results may differ from those in the forward-looking statements. Consequently, all of the forward-looking statements made are qualified by these cautionary statements. We cannot assure you that the results or developments anticipated by us will be realized or, even if substantially realized, that they will have the expected consequences to or effects on us or on our business or operations. For further discussion of the factors that could cause our actual results to differ, see the section titled “Risk Factors” on page x.

Neither the Company, BRLM, any member of the Syndicate nor any of their respective affiliates have any obligation to update or otherwise revise any statements reflecting circumstances arising after the date hereof or to reflect the occurrence of underlying events, even if the underlying assumptions do not come to fruition. In accordance with SEBI requirements, our Company and BRLM will ensure that the investors are informed of material developments until such time as the grant of listing and trading permissions by the Stock Exchanges.

RISK FACTORS

An investment in Equity Shares involves a high degree of risk. You should carefully consider all of the information in this Prospectus, including the risks and uncertainties described below, before making an investment in our Equity Shares. If any of the following risks actually occur, our business, results of operations and financial condition could suffer, the trading price of our Equity Shares could decline, and you may lose all or part of your investment.

These risks are not the only ones that we face. Our business operations could also be affected by additional factors that are not presently known to us or that we currently consider to be immaterial to our operations. Unless otherwise mentioned we are not in a position to quantify the extent of the risks specified herein.

Internal Risks

We have a pending income tax proceeding that, if determined against us, may have a material adverse impact on the financial condition of our Company

The Income Tax Department has imposed a liability of Rs. 72,357,482/- on us in relation to assessment year 2001-02 as against the returned income of Rs. 45,103,370/- as filed by us. The matter is currently pending before the Income Tax Appellate Tribunal, New Delhi. Any liability arising from this case could have a material adverse impact on our Company. For further details of the case mentioned above, see the section titled "Outstanding Litigation and Material Developments" beginning on page 131.

There are certain criminal proceedings pending against us.

There are three first information reports filed against our officers in Bangalore, in relation to the death of certain employees as a result of accidents in the course of employment. These cases have been filed against individuals who were in charge of the establishment at the time of the accident. Any criminal liability arising from these cases will accrue to the individuals against whom the cases have been filed. The individuals against whom these first information reports have been filed include Mr. Vidya Shankar, Mr. Pankaj Guptha and Mr. Suheel, amongst other employees. For further details of the cases mentioned above, see the section titled "Outstanding Litigation and Material Developments" beginning on page 131.

Any failure to accurately estimate the overall risks, revenues or costs in respect of a project, may affect our profits

Cost overruns, whether due to inefficiency, faulty estimates or other factors, result in lower profit or a loss on a project. A significant number of our contracts are based in part on cost estimates that are subject to a number of assumptions. If our estimates of the overall risks, revenues or costs prove inaccurate or circumstances change, then we may incur a lower profit or a loss on the contract.

Fixed price contracts ("FP Contracts") are fixed unit price contracts and generally require us as the contractor to provide all the resources required to complete a project for a fixed sum or at fixed unit price, except for cost of steel and cement (which represents the major cost of construction material). In these contracts, in the event we are unable to control the costs (other than steel and cement) our profit margins could get affected, or we may suffer a loss.

In certain FP Contracts even the cost of steel and cement may also be factored into the fixed price. In such contracts, an inability to control costs, including that of steel and cement, could affect our profit margins or cause us to suffer a loss.

We are subject to restrictive covenants under our credit facility that could limit our flexibility in managing the business.

There are restrictive covenants in agreements we have entered into with certain banks and financial institutions for short-term loans and long-term borrowings. These restrictive covenants require us to seek the prior permission of these banks/financial institutions for various activities, including, amongst others, alteration of our capital structure, raising of fresh capital or any term loans/debentures, incurring major capital expenditure, making any investments either directly or through our subsidiaries, undertaking new projects, undertaking any merger/amalgamation/restructuring, creation of a subsidiary and change in management. Though we have received approvals from all our lenders for this Issue, these restrictive covenants may also affect some of the rights of our shareholders, including the payment of the dividends. For details of these restrictive covenants, see the section titled "Financial Indebtedness" beginning on page 70.

We may not be able to fully realize the contract value reported in our order-book.

As of September 30, 2005, our order-book was approximately Rs. 5,791.23 million. We include a construction project in our order-book at such time as a contract is awarded or a firm letter of commitment is obtained. The contract value stated in our order-book may not be realized. For example, if a project reflected in our order-book is terminated, suspended or reduced in scope, it would result in a reduction to our order-book which may materially reduce the revenue and profits.

Loss of key managerial personnel could materially affect our business

Our business substantially depends on the continued service of our key managerial personnel. The loss of the services of our key managerial personnel could have a material adverse effect on us. Our future success will also depend on our ability to attract and retain highly skilled personnel, such as engineering, project management and senior management professionals. We could experience difficulty from time to time in hiring and retaining the personnel necessary to support our business. If we do not succeed in retaining our current employees and attracting new high quality employees, our reputation may be harmed and our future earnings may be negatively impacted.

Any failure in our IT systems could adversely impact our business.

Any delay in implementation or any disruptions in the functioning could disrupt our ability to track, record and analyze the work in progress, cause loss of data and disruptions of operations, including, among others, an inability to assess the progress of projects, process financial information or manage creditors / debtors or engage in normal business activities. This could have a material adverse effect on our business.

Micro Electronics, Birla Textile Mills and HCL Comnet Limited.

We have applied for renewals of licenses under the Contract Labour (Regulation and Abolition) Act, 1970 for construction work undertaken at IFFCO.

If we do not receive, renew or maintain our statutory and regulatory permits and approvals required to operate our business, it may have a material adverse effect on the continuity of our business and may impede our effective operations in the future.

We have allotted a total of 7,272,000 Equity Shares of our company of Rs. 10 each at par or by way of a bonus issue to our Promoter group. For further details please refer to notes to capital structure under the section titled "Capital Structure" beginning on page 17.

Inability to raise funds or to meet our working capital requirements may have an adverse impact on our financial performance

Our business requires us to raise funds from various sources and we also have substantial working capital requirements. In the event we are unable to raise finances or to meet our working capital requirements on terms acceptable to us, it may have an adverse impact on the cost of executing our projects and our profitability.

Changes in the scope of work may result in disputes which could have a material adverse impact on the profits from that project

In certain cases, we may be required to perform additional work on a project that is beyond the stated scope of the contract. We may not receive any remuneration for the same, or payments in respect of the same may be delayed or

B. L. KASHYAP AND SONS LIMITED

inadequate, which may have a material adverse effect on our profits.

Further, in certain contracts we are required to execute extra or change order work as directed by the client even if the scope or price of the work to be performed is not settled at the time of execution of the contract. This process may result in disputes and may result in delayed or inadequate payments, or in payments not being made at all. This could have an adverse effect on our profits.

Failure to adhere to agreed timelines could adversely affect our reputation and/or expose us to financial liability.

Typically construction contracts are subject to specific completion schedule requirements with liquidated damages chargeable in the event the construction schedules are not adhered to. Failure to adhere to contractually agreed timelines could cause damage to our reputation within the construction industry and client base, and cause us to pay liquidated damages.

Our failure to compete effectively could reduce our market share and profits.

New project awards are often determined through either a competitive bid basis or a negotiated basis. Bids or negotiated contracts with public or private owners are generally awarded based upon price, but many times other factors, such as shorter project schedules or prior experience with the owner, result in the award of the contract. Within our industry, we compete with many national, regional and local construction firms. Some of these competitors have achieved greater market penetration than we have in the markets in which we compete, and some have greater financial and other resources than we do. As a result, we may need to accept lower contract margins or more fixed price or unit price contracts in order for us to compete against competitors that have the ability to accept awards at lower prices or have a pre-existing relationship with the owner. If we are unable to compete successfully in such markets, our relative market share and profits could be reduced.

Our construction contracts are primarily dependent on adequate and timely supply of raw materials such as cement, steel and bricks at competitive prices.

Timely and cost effective execution of our projects is dependant on adequate and timely supply of raw materials. In case we are unable to procure the requisite quantities of raw materials well in time and at competitive prices, the performance of our Company may be adversely affected.

Our insurance coverage may not adequately protect us against certain operating hazards and this may have a material adverse effect on our business

Our significant insurance policies are the contractor's all risk policy in respect of a project and workmen's compensation policy to protect against losses caused to workmen through accident. While we believe that the insurance coverage that we maintain would be reasonably adequate to cover all normal risks associated with the operation of our business, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time. To the extent that we suffer loss or damage that is not covered by insurance or which exceeds our insurance coverage, our results of operations or cash flows may be affected.

Work stoppages and other labour problems could adversely affect our business

We operate in a labour-intensive industry and hire casual labour in relation to specific projects.. If we are unable to negotiate with the labour unions on acceptable terms, it could result in strikes, work stoppages or increased operating costs as a result of higher than anticipated wages or benefits. In addition, we may not be able to procure required casual labour for our existing or future projects. These factors could adversely affect our business, financial position, results of operations and cash flows.

We do not currently own nor have we leased the premises at which our registered office and branch office at Bangalore is located and do not own the premises at which our corporate office is located.

We do not currently own or have a lease for the premises at which our registered is located. We have been permitted by B.L.Kashyap (HUF), the owner of the premises, to use and occupy the said premises. B.L.Kashyap (HUF) may require us to vacate the premises with or without sufficient notice, which may adversely affect our business. We further do not own or have a lease for the premises at which our branch office at Bangalore is located. Additionally we do not own the premises at which the corporate office is located.

The 'B.L.Kashyap' trade name or logo has not been registered in our name; our failure to protect our intellectual property rights may adversely affect our business.

We do not have ownership of the trade name and logo "B.L.Kashyap". We have recently made an application for the registration of the name and logo with the concerned authorities. Any failure to protect our intellectual property rights may adversely affect our business.

Adverse weather conditions can delay the implementation of our projects

Implementation of our projects may get delayed due to adverse weather conditions, such as heavy rains and flood.

B. L. KASHYAP AND SONS LIMITED

Though we make adequate provisions for non-execution during certain seasons like monsoon, any unforeseen vagaries of nature and season may result in failure of our meeting the contractual obligations and consequently may adversely affect our business.

The objects of the Issue have not been appraised

The objects of the Issue for which the funds are being raised have not been appraised by any bank or financial institution. In the absence of such independent appraisal, the requirement of funds raised through this Issue, as specified in the section titled "Objects of the Issue" are based on our estimates and deployment of these funds is at the discretion of our management and our Board of Directors.

We have not placed orders for all the plant and machinery required in terms of our objects for the Issue nor have we identified the land for storage of equipments used for construction work.

We have not placed orders aggregating Rs. 533.38 million for the plant and machinery to be financed from the proceeds of this Issue. For the estimates where the orders are yet to be placed, we have relied on quotations received by us in the past and on our past experience. We have not yet identified the land for storage of equipments used for construction work for which we propose to raise approximately Rs.150 million from the proceeds of the Issue.

Our inability to follow our business or growth strategy could have an adverse impact on our results of operations

Our growth and business strategy is dependant on market conditions, our ability to identify and take advantage of opportunities, abilities of our key managerial personnel to guide our policies appropriately and many other factors. In addition, our expansion in new and existing markets may present challenges that differ from those in our current operations. In the event that we are unable to implement our growth plans it could lead to delays and cost overruns and affect our results of operations.

External Risk Factors

We are subject to adverse impact of economic and political conditions

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, consumer credit availability, consumer debt levels, tax rates and policy, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude. The taxation system within the country still remains complex. Changes in local taxes and levies can impact our performance adversely.

Terrorist attacks or acts of war may seriously harm our business

Terrorist attacks may cause damage or disruption to our company, our employees, our facilities and our customers, which could impact our results from operations. Any future terrorist attacks, the national and international responses to terrorist attacks, or other acts of war or hostility may cause greater uncertainty and cause our business to suffer in ways that we currently cannot predict.

An active market for the Equity Shares may not develop which may cause the price of the Equity Shares to fall and may limit your ability to sell the Equity Shares.

The stock market in general and the market for shares of construction companies in particular, have from time to time experienced considerable price fluctuations. Often, these changes may have been unrelated to the operating performance of the affected companies. In addition, factors such as competition, general regional and national economic conditions, bulk deal in our stocks, and changes in our project mix, and lack of new initiatives to spur growth in sales may have an adverse effect on the market price of our Equity Shares. The Equity Shares are new issues of securities for which there is currently no trading market. No assurance can be given that an active trading market for the Equity Shares will develop or as to the liquidity or sustainability of any such market, the ability of holders of the Equity Shares to sell their Equity Shares or the price at which shareholders will be able to sell their Equity Shares. If an active market for the Equity Shares fails to develop or be sustained, the trading price of the Equity Shares could fall. If an active trading market were to develop, the Equity Shares could trade at prices that may be lower than their initial offering price.

Future issues or sales of our Equity Shares may significantly affect the trading price of the Equity Shares.

Future issue of Equity Shares /convertible instruments by us or the disposal of Equity Shares by any of the major shareholders or the perception that such issues or sales may occur may significantly affect trading price of the Equity Shares. Other than the lock-in of pre-issue capital as prescribed under SEBI Guidelines, none of our shareholders are subject to any lock-up arrangements restricting their ability to issue Equity Shares or the Shareholders' ability to dispose of their Equity Shares, and there can be no assurance that any shareholder will not dispose of, encumber, or pledge, its shares. For details of lock in of pre-issue Equity Share capital and Promoters' contribution please see the section titled "Capital Structure" beginning on page 17.

B. L. KASHYAP AND SONS LIMITED

We are subject to risks arising from interest rate fluctuations, which could adversely affect our business, financial conditions and results of operations

Changes in interest rates could significantly affect our financial condition and results of operations. Our loans are denominated in Indian Rupees and we are exposed to fluctuations in domestic interest rates.

The interest rate that we will be able to secure in future debt financing that we may require for capital and other expenditures associated with our future requirements will depend on market conditions prevailing at that time and may differ from the rates of our existing debt. This may adversely impact results of our operations, planned capital expenditures and cash flows.

Natural calamities could have a negative impact on the Indian economy and cause our business to suffer

India has experienced natural calamities such as earthquakes, a tsunami, floods and drought in the past few years. The extent and severity of these natural disasters determines their impact on the Indian economy. For example, as a result of drought conditions in the country during fiscal 2003, the agriculture sector recorded a negative growth of 5.2%. The erratic progress of the monsoon in 2004 has also adversely affected the sowing operations of certain crops. Further prolonged spells of rainfall below normal levels or other natural calamities could have a negative impact on the Indian economy, adversely affecting our business and results of operations.

SUMMARY

Please read the following summary together with the “Risk Factors” beginning on page x and our financial data in the section titled “Financial Statements” beginning on page 105.

Industry Overview

The construction sector is an integral part of the economy of a nation and defines a country’s infrastructural and industrial landscape. The construction industry generates substantial employment and provides a growth impetus to other sectors through multiple linkages. The global construction industry is expected to record growth rates exceeding 5% over the next few years.

In India, construction activities account for 6% of the GDP. The construction sector is the third largest employer in the country after agriculture and retail. It also recorded the highest growth rate in generation of jobs in the last two decades, doubling its share in total employment.

India is expected to record the highest rate of growth of spending in the construction industry over the period 2004-08, with growth rate above 10% per annum expected to continue up to 2008.

The construction industry can be broadly divided into three segments – housing, industrial and infrastructure.

The changing demographics, lower interest rate regime, rising disposable incomes, stable property prices and fiscal incentives are the main drivers of the growth in the housing segment. Rapid expansion in retail, IT/ITES and manufacturing sectors is expected to boost construction demand.

The real estate sector in India has assumed growing importance with the liberalization of the economy. The consequent increase in business opportunities and migration of the labour force has, in turn, increased the demand for commercial and housing space, especially rental housing. Developments in the real estate sector are being influenced by the developments in the retail, hospitality and entertainment (e.g., hotels, resorts, cinema theatres) industries, economic services (e.g., hospitals, schools) and information technology (IT)-enabled services (like call centres) etc.

Business Overview

The Kashyap family has been in the business of construction and allied services since 1978.

Our present activities primarily involve construction services including turnkey projects that comprise civil construction, electrical, plumbing, fire-fighting, air conditioning and other works. We also provide a wide range of furnishing and fit outs through our wholly owned subsidiary “BLK Furnishers and Contractors Private Limited”. We have also established a subsidiary with the name of “Soul Space Projects Limited” for carrying out residential construction activities. We have commenced real estate development through our subsidiary in Pune. We also have a subsidiary “Security Information Systems (India) Limited” which deals in supply, installation, commissioning, servicing of integrated security information systems, building management systems, fire alarm, fire protection system, access control and other security systems.

Broadly, our business activities could be categorized into four segments:

- (i) Commercial Construction
- (ii) Corporate Construction
- (iii) Residential Construction
- (iv) Industrial Construction

We cater to the construction needs of diverse sectors such as hospitals & hospitality, industrial, IT / ITES, malls & multiplexes. We are also involved in construction and turnkey projects catering to residential and corporate office requirements.

Our revenues have grown from Rs. 781 million in fiscal 2001 to Rs. 3131 million in fiscal 2005 at a CAGR of 80.2 % and unconsolidated net profits before taxes have grown from Rs. 26 million in fiscal 2001 to Rs. 112.5 million in fiscal 2005 at a CAGR of 86.3%.

Our Competitive Strengths

We provide a one stop construction solution on “design build” model

We provide a wide range of construction services from erection and civil work to electromechanical and allied services. In addition, we provide interiors and furnishings through our wholly owned subsidiary “BLK Furnishers and Contractors Private Limited”. Consequently, we are able to provide a wide range of services relating to construction and finishing of

B. L. KASHYAP AND SONS LIMITED

a structure and deliver a fully furnished building to the client. For instance, our ongoing IFFCO project is on design build basis wherein we are providing an office setup in which the client will commence operations on delivery, and are providing the entire civil, electrical, plumbing, fire fighting, air conditioning, intelligent building management systems and all furniture and fit outs. This enables the client to avoid the additional time and cost overruns. We believe that our ability to provide these turnkey solutions gives us an edge over our competitors, increases our flexibility, and also provides higher profit margins than we would have enjoyed had we been unable to offer these additional services. In addition, we benefit from our ability to offer a wide range of services since, when we place bids for contracts, we are able to bid as an entity able to deliver turnkey projects. This, we believe, gives us an advantage over construction companies who are not able to provide these additional services.

Our revenue is primarily derived from business emanating from the private sector

We primarily cater to the private sector including reputed corporates such as International Business Machines (“IBM”) (for Golf Links Software Park Private Limited), Microsoft Corporation (for Golf Links Software Park Private Limited), Oberoi Hotels, Taj Hotels, Hyatt, Fidelity Business Services Private Limited, Cadence Designs Systems (India) Private Limited, Adobe Systems India Private Limited etc. In our experience, contracts in the private sector are largely awarded based on criteria like timely delivery, quality of performance, strength of the execution team, reliability, etc and not just on the basis of the lowest price quoted. We believe that our reputation with the private corporate sector enables us to command a premium position in the construction industry and have led to corporate houses like Cadence Designs Systems (India) Private Limited, Adobe Systems India Private Limited, Hughes Software Systems, HCL Perot Systems Limited and developers like Embassy, Brigade, Mantri, Akme becoming our repeat customers.

Further, it has been our experience that the private sector has normally made payments on time and we receive payments according to the terms selected and agreed upon, which are normally less rigid than the contracts in the public sector. Further, disputes settlement are often mutually settled. The terms of a contract with a private party, in our experience, typically lends itself to more flexibility and are open to discussions while finalizing the project.

In our experience the private sector has offered us more acceptable payment terms, recognition and the flexibility to rectify pricing errors, in the event that we have quoted an inaccurate price, in addition to flexibility of contract and payment terms. We have had negligible bad debts to be written off since inception.

Proven performance within contractually stipulated time limits

We have consistently adhered to performance and time parameters stipulated in respect of construction projects executed by us. This has been made possible due to a capable, efficient, qualified and professional team which has been built over the years.

Efficient deployment of manpower, materials and equipment

Our efficiency in execution, specifically in respect of efficient deployment of manpower, material and equipment enables us to generate higher revenues and helps us to control our inventory costs. The rapid use of equipment controls our inventory costs and also increases the turnover in the respective projects. This also enables us to have lower overheads, increases our profitability and turnover because we are able to use the same equipment/ and manpower at another project at a faster pace.

Ownership of modern concreting/shuttering equipment

We own modern equipment and shuttering materials. It has been our experience that in most cases, the cost of hiring equipment over a period of time is high, and hence we believe that ownership and usage of modern concreting/shuttering equipment results in a cost advantage for us.

Experienced Promoters with proven track record

The Kashyap family entered the business of construction services in the year 1978. Our Promoters, namely, Mr. Vinod Kashyap, Mr. Vineet Kashyap and Mr. Vikram Kashyap are also directors on the Board of our Company, and have been in the business of construction for over 25 years. Our management team led by our Promoter directors has gathered substantial experience and expertise in various aspects of the business of construction. Further, the prevalent organizational hierarchy of our Company enables the management to take quick and efficient decisions to execute construction projects within contracted timelines. We believe that this enables us to meet expected standards of quality and efficiency.

Highly experienced, skilled, qualified and dynamic team, and low attrition rates

We have, over the past number of years, developed and built a team of capable and qualified personnel who oversee

B. L. KASHYAP AND SONS LIMITED

and manage the various facets of our Company's operations. Our team comprises of key management personnel who are veterans in the construction industry, many some of whom have spent over 25 years in the industry. They are experienced in executing quality projects within the contracted time frames. The attrition levels of key managerial personnel have been low. Our senior key managerial personnel have been with our Company for more than 15 years, and we believe that this reflects that we have proven our ability to retain and motivate and re-skill our employees.

High standards of integrity and efficiency

Our management believes in maintaining high standards of integrity and honesty which we believe has resulted in generating business and has also built a reputation for honesty. We use appropriate materials in accordance with the specifications contractually agreed to by us and we meet the contractually agreed specifications for the construction projects executed by us.

Business/Growth Strategy

We are currently focused on commercial, industrial, corporate and residential construction. We primarily service the private sector and have executed projects for reputed corporate houses. We have also executed a variety of end-use structures including hotels, hospitals, office buildings, residential complexes and industrial plant buildings. We would continue to focus on the existing range of construction services that we offer with specific emphasis on the following factors as a business and growth strategy:

- Increasing the scope of work for each order by adding hard and soft finishes and electro mechanical services and associating with larger projects.
- By ensuring association with reputed corporate houses and executing important projects to their satisfaction, which enables us to build our Company's brand name and image in the construction industry.
- To build structures which have cutting edge design and specialty structures.
- Diversify and undertake projects in various industries.
- Quality and timely delivery in the execution of projects across industry segments and geographical locations.
- Extending our activities to other areas such as construction of residential townships and entering real estate development through our subsidiary "Soul Space Projects Limited" in Bangalore, Pune and other sub metro towns and cities.
- Providing a diversified range of services including furniture and furnishings enabling us to bid for projects in a comprehensive manner and to provide a one stop solution to clients.

Increasing the scope of work for each order and associating ourselves with larger projects

It is our constant endeavor to be associated with large projects. For instance, we are focused on construction of residential complexes which have a built up area of over 300,000-400,000 sq. ft. and in respect of which the contract value would typically exceed Rs. 1,000 million. We aim to continue to be associated with large projects in industrial construction like the diesel plant for Maruti Udyog Ltd. which has a contract value of Rs 265 million.

We try to increase the scope of work in each order to add value to the project, for e.g. in the case of the IFFCO headquarters in New Delhi where, besides civil constructions we acted as the principal contractor for the complete construction, interiors and mechanical services.

Association with reputed corporates

We have been associated with reputed corporates including IBM (for Golf Links Software Park Private Limited), Microsoft (for Golf Links Software Park Private Limited), Oberoi Hotels, Taj Hotels, Hyatt, Fidelity Business Services Private Limited, Cadence Design Systems (India) Private Limited, Adobe Systems India Private Limited amongst others. We have also secured repeat business from various corporates for whom we have constructed structures such as Escorts Limited, Hughes Escorts Communications Limited and their group companies, HCL Perot Systems Ltd. and Maruti Udyog Limited and their group companies. Our growth strategy also involves continuing to service reputed corporate clients in the future since we believe it would enhance our brand image and credibility in the construction industry. We are currently executing projects for corporates such as IFFCO, Maruti Udyog Limited and Uppal Housing Private Limited.

Building structures which have cutting edge design and structure specialties.

Our strategy is to build a wide variety of structures which have unique design and structural specialties. We believe that constructing such specialized structures would enhance our range of construction service offerings and assist us in securing specialized construction projects.

B. L. KASHYAP AND SONS LIMITED

Undertaking projects in a variety of sectors

We have, in the past, catered to a range of industries which has contributed to increasing our technical know how, capabilities and range of service offerings. This has also enabled us to de-risk our business model since we are not significantly dependent on any particular industry or a set of industries for our future revenues. In the absence of growth in any industry, we believe that we have the capability of mobilizing our resources to such industries as may be required thereby ensuring continuity of business. We aim to continue to diversify our activities in various industries.

Thrust into real estate

Our foray into real estate is through our subsidiary “Soul Space Projects Limited” and we plan to initially focus on the residential sector. We believe that we can use the expertise and knowledge gained in the course of executing our various projects in our proposed thrust into the real estate sector. In the initial stages, we plan to primarily cater to markets in Bangalore and Pune. We plan to use our association with Akme Projects Limited, to assist in our foray in Bangalore. We believe that our brand and credibility would aid in the development and marketing of residential complex.

Diversified range of furnishings and fit outs

We aim to provide a range of furnishings such as interiors, aluminum fittings, modular kitchens through our wholly owned subsidiary “BLK Furnishers and Contractors Private Limited”. GREEN SHOE OPTION

We propose to avail of an option for allocating Equity Shares in excess of the Equity Shares included in the Issue in consultation with the BRLM and the Stabilising Agent, in order to operate a post listing price stabilising mechanism, in accordance with the SEBI Guidelines, i.e., the Green Shoe Option. Our shareholders at the extraordinary general meeting held on December 14, 2005 have authorized the Green Shoe Option.

Edelweiss Capital Limited has agreed to act as the stabilizing agent for the purposes of effectuating the Green Shoe Option, as envisaged under Chapter VIII A of the SEBI Guidelines.

Mr. Vineet Kashyap, one of our Promoters has agreed to lend the Loaned Shares to the Stabilising Agent for the purposes of effectuating the Green Shoe Option.

The Stabilising Agent shall be responsible for, *inter alia*, price stabilisation post listing, if required, but there is no obligation to conduct stabilising measures. If commenced, stabilising will be conducted in accordance with applicable laws and regulations and may be discontinued at any time. In any event, the stabilizing activities shall not continue for a period exceeding 30 days from the date of the receipt of permission for trading of the Equity Shares from the Stock Exchanges. For the purposes of the Green Shoe Option, the Stabilising Agent shall borrow the Loaned Shares from the Green Shoe Lender. The Loaned Shares and/or purchased from the market for stabilising purposes will be in dematerialised form only.

We have entered into the Stabilising Agreement with the Green Shoe Lender and the Stabilising Agent for the exercise of the Green Shoe Option on the terms and conditions detailed therein.

The terms of the Stabilising Agreement provide that:

1. Stabilisation Period

Stabilisation Period shall mean the period commencing from the date of obtaining trading permission from the Stock Exchanges for the Equity Shares under the Issue, and ending 30 days thereafter, unless terminated earlier by the Stabilising Agent.

2. The primary objective of the Green Shoe Option is stabilisation of the market price of Equity Shares after listing. Towards this end, after listing of Equity Shares, in case the market price of the Equity Shares falls below the Issue Price, then the Stabilising Agent, at its discretion, may purchase Equity Shares from the market with the objective of stabilisation of the market price of the Equity Shares.

3. Decision regarding Exercise of Green Shoe Option

- (i) Post the Bid/Issue Closing Date, the BRLM and us, in consultation with the Stabilising Agent, shall take a decision relating to the exercise of the Green Shoe Option.
- (ii) In the event, it is decided that the Green Shoe Option shall be exercised, the Company in consultation with the BRLM, shall make over allotment of Equity Shares as per the procedure detailed below.

4. Procedure for Over Allotment and Stabilisation

- (i) The allotment of the Over Allotment Shares shall be done pro rata with respect to the proportion of Allotment in the Issue to various categories.
- (ii) The monies received from the Bidders for Equity Shares in the Issue against the over allotment shall be kept in the GSO Bank Account distinct and separate from the Issue Account and shall be used only for the purpose of buying shares from the market during the Stabilisation Period for the stabilization of the post listing price of the Equity Shares.
- (iii) Upon such allotment, the Stabilising Agent shall transfer the Over Allotment Shares from the GSO Demat Account to the respective depository accounts of the successful Bidders.
- (iv) For the purpose of purchasing the Equity Shares, the Stabilising Agent shall use the funds lying to the credit of GSO Bank Account.
- (v) The Stabilising Agent shall determine the timing of buying the Equity Shares, the quantity to be bought and the price at which the Equity Shares are to be bought from the market for the purposes of stabilisation of the post listing price of the Equity Shares.
- (vi) The Equity Shares purchased from the market by the Stabilising Agent, if any, shall be credited to the GSO Demat Account and shall be returned to the Green Shoe Lender within two working days from the expiry of the Stabilisation Period.

B. L. KASHYAP AND SONS LIMITED

- (vii) On the expiry of the Stabilisation Period, in the event the Equity Shares lying to the credit of the GSO Demat Account at the end of the Stabilisation Period but before the transfer to the Green Shoe Lender is less than the Over Allotment Shares, upon being notified by the Stabilising Agent, we shall within five days of the end of the Stabilisation Period allot, new Equity Shares in dematerialized form for the number equal to such shortfall to the credit of the GSO Demat Account. The newly issued Equity Shares shall be returned by the Stabilising Agent to the Green Shoe Lender in lieu of the Over Allotment Shares, within two working days of them being credited into the GSO Demat Account, time being of essence in this regard.
- (viii) Upon the return of Equity Shares to the Green Shoe Lender pursuant to and in accordance with sub-clauses (vi) and (vii) above, the Stabilising Agent shall close the GSO Demat Account.
- (ix) The Equity Shares returned to the Green Shoe Lender shall be subject to remaining lock-in-period, if any, as provided in the SEBI Guidelines.

5. GSO Bank Account

The Stabilising Agent shall remit from the GSO Bank Account to our Company, an amount, in Rupees, equal to the number of Equity Shares allotted by us to the GSO Demat Account at the Issue Price. The amount left in this account, if any, after this remittance and deduction of expenses and net of taxes, if any, shall be transferred to the investor protection fund of the Stock Exchanges in equal parts. Upon transfer of monies as above, the GSO Bank Account shall be closed by the Stabilising Agent.

6. Reporting

The Stabilising Agent shall also submit a final report to SEBI in the format prescribed in Schedule XXIX of the SEBI Guidelines. This report shall be signed by the Stabilising Agent and us and be accompanied by the depository statement for the GSO Demat Account for the Stabilisation Period indicating the flow of shares into and from the GSO Demat Account. If applicable, the Stabilising Agent shall, along with the report give an undertaking countersigned, if required by the respective depositories of the GSO Demat Account and the Lender regarding confirmation of lock-in on the Equity Shares returned to the Lender in lieu of the Over-Allotment Shares.

7. Rights and Obligations of the Stabilising Agent

- (iii) Stabilise the market price as per the SEBI Guidelines, only in the event of the market price falling below the Issue Price, including *inter alia* the determination of the price at which such Equity Shares are to be bought and the timing of such purchase.
- (iv) On or prior to the Pricing Date, to request the Green Shoe Lender to lend the Loaned Shares and to transfer funds from the GSO Bank Account to Green Shoe Lender within a period of five working days of close of the Stabilisation Period.
- (v) The Stabilising Agent, at its discretion, would decide the quantity of Equity Shares to be purchased, the purchase price and the timing of purchase. The Stabilising Agent, at its discretion, may spread orders over a period of time or may not purchase any Equity Shares under certain circumstances where it believes purchase of the Equity Shares may not result in stabilisation of market price.
- (vi) Further, the Stabilising Agent does not give any assurance that it would be able to maintain the market price at or above the Issue Price through stabilisation activities.
- (vii) On expiry of the Stabilisation Period, to return the Equity Shares to the Green Shoe Lender either through market purchases as part of stabilising process or through issue of fresh Equity Shares by us.

Illustration of Book Building and Price Discovery Process (*Investors may note that this illustration is solely for the purpose of easy understanding and is not specific to the Issue*).

Bidders can bid at any price within the price band. For instance, assuming a price band of Rs. 40 to Rs. 48 per share, issue size of 6,000 equity shares and receipt of nine bids from bidders details of which are shown in the table below. A graphical representation of the consolidated demand and price would be made available at the website of the BSE (www.bseindia.com) and NSE (www.nseindia.com). The illustrative book as shown below, shows the demand for the shares of the company at various prices and is collated from bids from various investors.

Number of equity shares bid for	Bid Price (Rs.)	Cumulative equity shares bid	Subscription
500	48	500	8.33%
700	47	1,200	20.00%
1,000	46	2,200	36.67%
400	45	2,600	43.33%
500	44	3,100	51.67%
200	43	3,300	55.00%
2,800	42	6,100	101.67%
800	41	6,900	115.00%
1,200	40	8,100	135.00%

The price discovery is a function of demand at various prices. The highest price at which the issuer is able to issue the desired quantum of shares is the price at which the book cuts off i.e. Rs. 42 in the above example. The issuer, in consultation with the BRLM will finalise the issue price at or below such cut off price i.e. at or below Rs. 42. All bids at or above this issue price and cut-off bids are valid bids and are considered for allocation in respective category.

The schedule related to placement of orders and procurement of remaining plant and machineries is as under:

Particulars	Date of commencement	Date of completion
Placement of orders	April 2005	June 2006

Land and Building

We propose to acquire land near Delhi and Bangalore for storage of the equipments used for construction work. We also plan to construct a workshop for repair and maintenance of the construction plant and machinery and other equipment. Since we have a number of projects in and around Delhi and Bangalore, the proposed facility will enable quick turnaround and assist in faster servicing of project sites. We estimate that the total cost of acquisition/construction of the proposed land and building would be approximately Rs. 150 million. However, we are in the process of identifying lands for the same.

Investments in our wholly owned subsidiary, BLK Furnishers

BLK Furnishers provides an entire range of services in relation to interiors and furnishing requirements in construction projects in the corporate sector.

Our association with BLK Furnishers enables us to commence bidding for projects on a turnkey basis, wherein we are now able to bid for the entire project including civil construction and furnishings and interiors.

We propose to invest an amount of Rs. 200 million in the subsidiary through equity investments in BLK Furnishers, which would be utilized for setting up a factory for the manufacture of kitchen cabinets, doors and door frames, wooden flooring and other related furnishings. The said funds would be utilized for procurement of plant and machinery for manufacture of the said items, long term working capital and establishment/branding expenses. The schedule of implementation and deployment of funds are as follows:

(Rs. In million)

Particulars	During fiscal 2006	During fiscal 2007	Total

We have not been assured of any dividend benefits accruing from our investments in BLK Furnishers. We confirm that there is no other project of BLK Furnishers for which money is being raised in this Issue.

The management, in accordance with the policies setup by our Board, will have flexibility in deploying the proceeds received from the Issue. Pending utilization for the purposes described above, we intend to temporarily invest the funds in high quality interest bearing liquid instruments including deposits in banks, for the necessary duration or for reducing working capital requirement. The Issue proceeds would be deposited in an escrow account which would be utilized for the Objects of the Issue and interim investment of funds which would be invested in fixed deposits in a scheduled commercial bank.

Appraisal

Our funds requirements and deployment thereof are based on internal management estimates, and have not been appraised by any bank/financial institution. In case of any variations in the actual utilization of funds earmarked for the above activities, increased fund deployment for a particular activity may be met with, in the first instance, by surplus funds, if any available in respect of the other activities for which funds are being raised in this Issue, otherwise by additional debt and/or equity. In addition to the above mentioned requirements, the balance proceeds of this Issue, if any, will be used for, among other things, the purposes mentioned above and/or to reduce our working capital requirement and/or for the repayment of debt.

Monitoring of Utilisation of Issue Proceeds

Our Board of Directors and Canara Bank, the monitoring agency appointed by us, will monitor the use of proceeds from this Issue and we will disclose details of the use of the Issue proceeds in a separate head in the balance sheet for fiscal 2006 and 2007. Besides, part of the project cost is funded through term lending from banks who would also monitor the utilization of the Issue proceeds towards the stated objects. We will disclose the utilization of the net proceeds of the Issue under a separate head in our Balance Sheet for Fiscal 2006 and 2007 clearly specifying the purposes for which such proceeds have been utilized. After the Bid/Issue Closing Date, an electronic book will be prepared by the Registrar to the Issue on the basis of Bids received. Based on the electronic book, QIB Bidders will be sent a CAN indicating the number of Equity Shares that are being allocated to them. However, within a few days thereafter but prior to the Board meeting for final allotment of Equity Shares in the Issue, the Registrar to the Issue will also prepare a physical book, which may be different from the electronic book. As a result, additional Equity Shares may be available for allocation in the QIB Portion provided the QIB Portion is oversubscribed and the Non-Institutional Portion and Retail Portion are not fully subscribed. In such event, QIB Bidders may receive an increased allocation of Equity Shares and such increase in allocation will be reflected in a revised CAN that is sent to QIB Bidders.

Construction Industry

The construction sector forms a pivotal industry in the economy of a nation. It is an integral part and defines a country's infrastructural and industrial landscape. It includes hospitals, schools, townships, offices, houses and other buildings; industrial construction; urban infrastructure (including water supply, sewerage, drainage); highways, roads, ports, railways, airports; power systems; irrigation and agriculture systems; telecommunications etc. Covering so wide a spectrum, construction forms a basic input for socio-economic development.

At a global level, construction spending reached nearly US\$ 4.2 trillion in 2004, a 4.6% increase over 2003, with future growth rates expected to exceed 5% annually over the next four years. Increased spending on infrastructure and non-residential development is largely driving this growth.

The chart below depicts the amount spent in the construction industry by various countries in 2004.

Role of the construction sector in the economy

The construction industry generates substantial employment and provides a growth impetus to other sectors through multiple linkages. Hence it is regarded as one of the most important nation building sectors in an economy.

- The construction industry accounts for a sizeable portion of a country's GDP; it accounts for about 8 per cent of UK's GDP, 16 per cent of Ireland's and 11 per cent of Dubai's. The construction sector was one of the prime drivers of the impressive 16 per cent growth in Dubai's GDP in 2004.

B. L. KASHYAP AND SONS LIMITED

In India, construction activities account for 6% of the GDP. The share of the construction sector in total gross fixed capital formation (GCF) stood at 44 per cent in 1999-2000.

- As an economic activity, construction is widely perceived to have the maximum number of linkages, both forward and backward, with other activities. These include cement, steel, bricks/tiles, sand/aggregates, fixtures/fittings, paints and chemicals, construction equipment, petro-products, timber, mineral products, aluminum, glass and plastics.
- The construction sector multiplier effect is estimated at about 1.8 times on core sector industries like steel, cement, aluminum, petroleum, timber, glass, paints and chemicals, construction equipment. A study by rating agency ICRA shows that the construction industry ranks 3rd among the 14 major sectors in terms of direct, indirect and induced effects in all sectors of the economy.
- The construction sector is the third largest employer in the country after agriculture and retail. In 1999-2000, the sector employed 17.62 million workers, a rise of 6 million over 1993-94. It also recorded the highest growth rate in generation of jobs in the last two decades, doubling its share in total employment.

Construction industry – Growth outlook

China, India, Korea, Thailand and Vietnam are expected to achieve the fastest growth rates in the region, in the medium term. Re-construction following the extensive damage caused by the Indonesian earthquake is likely to stimulate construction spending growth in Sri Lanka, Thailand, India, Indonesia and the Maldives as these countries race to replace damaged infrastructure and repair battered tourist facilities.

A surge of growth in India is leading global construction activity. As can be seen from the chart below, India is expected to record the highest rate of growth of spending in the construction industry over the period 2004-08, with growth above 10% per annum expected to continue to 2008. The main, demand in India is being driven by increased spending on infrastructure and industrial projects.

Components of the construction industry

The Indian construction industry can be broadly divided into three segments:

1. Housing segment
2. Industrial segment
3. Infrastructure segment

Overall, the construction industry is highly fragmented; the industry's low capital -intensity and low entry barriers are primarily responsible for this. The fragmentation is, however, limited in the infrastructure and industrial projects segments as compared to the housing sector since the former requires more specialised skill sets.

Given below is an overview of the Indian construction industry-

Each of these segments has been explained in detail below. The following table shows the outlay made during the different Plan periods in each of these segments.

Housing segment

The Indian housing industry is highly fragmented, with the unorganised sector, comprising of small builders and contractors, accounting for over 70% of the housing units constructed. The organised sector comprises of large builders and government or government-affiliated entities.

Growth

The investment in housing has steadily risen over the Plan period and as can be seen from the table below, the Tenth Five Year Plan envisages a growth of 381% in the total investment made in the housing segment.

Table: Investment in housing during different plan periods

(Rs bn)	Total Investment	% growth
First Plan (1951-56)	11.5	-
Second Plan (1956-61)	13.0	13%
Third Plan (1961-66)	15.5	19%
Fourth Plan (1969-74)	28.0	81%
Fifth Plan (1974-79)	44.4	59%
Sixth Plan (1980-85)	194.9	339%
Seventh Plan (1985-90)	314.6	61%
Eighth Plan (1992-97)	975.0	210%
Ninth Plan (1997-02)	1,510.0	55%
Tenth Plan (2002-07)	7,263.0	381%

Such growth is envisaged owing to the housing shortage, currently faced. The Tenth Five Year Plan on urban development has estimated an additional requirement of about 4.5 million houses each year during the Plan period (2002- 07). The National Buildings Organization (NBO) has estimated urban-housing shortage of 10.8 mn dwelling units. With this level of shortage it is estimated that the urban housing sector alone would require a total investment of Rs. 11,567 bn during the next five years. The total fund requirement, including requirement for rural housing would be Rs. 16, 000 bn. whereas the total availability is Rs. 7,200 bn only from the formal sector.

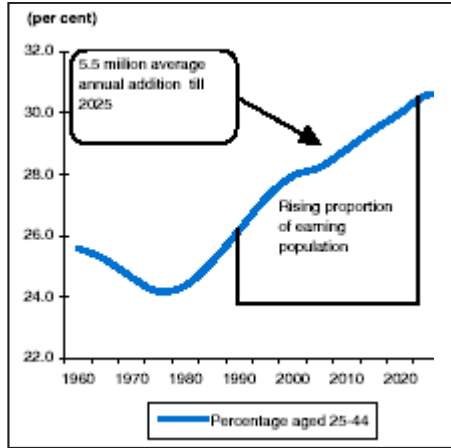

Growth drivers in the housing industry

The changing demographics, lower interest rate regime, rising disposable incomes, stable property prices and fiscal incentives are the main drivers of the growth in the housing segment.

- Increasing percentage of population in the age group of 25-44

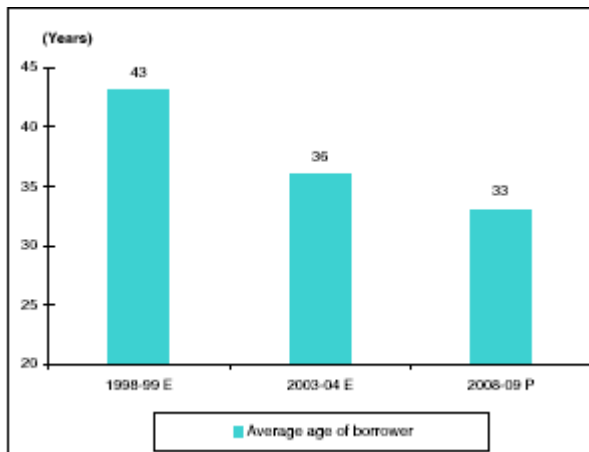

Given the rising income levels and the decreasing age of those buying homes (currently 35-36 years), the population in the 25-44 age group holds the key to the growth in housing demand. At present, about 28 per cent of India’s population is in the 25-44 age bracket. This figure is expected to increase to about 30.6 per cent by 2025, an addition of approximately 5.5 million people each year, which could translate to a further 2.75 million new households per year.

b) Shrinking household size augments demand for houses

The joint family system in India is gradually giving way to nuclear families. Consequently, the average size of the Indian household has shrunk from about 5.59 persons in 1971 to about 5.30 persons in 2001. Increasing urbanization and migration for employment opportunities are expected to narrow down the size of the average household to about 4.97 persons by 2011. Given India’s burgeoning population, the contraction in the size of the average household offers a strong positive outlook for housing demand.

c) Increasing urban middle class population

The Indian urban middle class (annual income Rs 90,000-Rs 500,000), which holds the key to consumer spending, has seen its share in total urban households increase from about 45% in 1998-99 to about 51% in 2001-02. Urban middle class households in India are expected to account for about 63% of the total urban households by 2009-10. More importantly, the average income of the urban middle class has increased from Rs 163,000 in 1998-99 to nearly Rs 169,000 in 2001-02, and is expected to increase to Rs 194,000 by 2009-10.

d) Increased acceptability of credit

India has witnessed a psychological shift from aversion to credit and considering credit a social stigma to viewing credit as a means of fulfilling individual and familial aspirations.

The housing finance market has recorded robust growth in the last few years, clocking an annual growth rate of about 40% between 1998-99 and 2003-04 to reach Rs.569 billion in 2003-04 from about Rs.107 billion in 1998-99, as can be seen from the chart below. This was partly stimulated by the declining interest rates on home loans.

The housing finance market is expected to continue its double-digit growth, recording an annual growth rate of 18.8% to reach Rs. 1,347 billion by 2008-09.

Chart: Housing finance market (1999-00 to 2003-04)

e) Shift in consumer preference from rented houses to owned houses

Over the years, there has been a significant decline in the proportion of households staying in rented premises. This can, to some extent, be attributed to rising income levels. In addition, the old Rent Control Act (State Act) offered greater protection to the tenant and low rentals made returns on investments in rental property unattractive. But with fewer properties available on rent today and a rise in rentals, consumers have found it more prudent to invest in property for self-occupancy. Rising aspiration levels and the easy availability of finance are expected to fuel this trend.

Table: Distribution of households by ownership status

(per cent)	Urban areas				
	1961	1971	1981	1991	2001

f) Increasing median home size

Rising income levels have increased the aspiration of borrowers to live a better life. This, coupled with easy availability of finance and steady real estate prices, has led to people shift towards larger houses.

g) Fiscal incentives

In order to induce demand, the government provides tax incentives to the borrowers that reduce the cost of borrowing, making the option of availing of a loan to purchase/construct a house more economical. Interest payments up to certain levels on housing loans can be claimed as a deduction from the taxable income and annual principal repayment up to a particular level is eligible for a rebate from the tax liability. An exemption of long term capital gains can be availed of in the case of re-investment in a second property.

Shopping Malls & Commercial Complexes

Almost 80% of real estate developed is residential space and the rest comprises offices, shopping malls, hotels and hospitals.

Rapid expansion in the retail space is taking place in the country and this is reflected in the purchase and development of real estate and the rapid construction of malls. Retail consultancy KSA Technopak estimates that 200 malls will come up between 2005 and 2006. In all 40 mn sq ft of retail space will be added in the next 2 -3 years.

Rapid boom witnessed by India in the IT/ITES sectors has resulted in an acute shortage for quality space for office and commercial structures. It has been estimated that there is a demand for approximately 75-85 mn.sq.ft. of IT space over the next five years. In effect, this will create substantial demand for construction of commercial complexes.

Industrial construction

Industrial construction projects include construction of manufacturing facilities, civil and structural activities for a number of capital intensive industries like cement, fertilizers, petroleum etc. The total outlay for the industrial segment in the Tenth Five Year Plan is Rs.2560 billion, a growth of 103% from the outlay of Rs.1262.3 in the Ninth Five Year Plan.

The total investments in the key segments of the manufacturing sector are projected to increase from Rs.220 billion per annum (1998-99 to 2004-05) to Rs.734 billion per annum over the next 5 years (2005-06 to 2009-10), propelled by investments in oil and gas, and metals. Other industries such as automobiles, petrochemicals, cement, paper and fertilizers are also expected to record healthy investments during the forecasted period. Assuming civil construction to account for nearly 15% of the total capital cost of the projects, this huge investment is likely to generate construction demand of around Rs.550 billion from industrial projects.

Infrastructure

Valued at Rs.2,070 bn, the infrastructure segment is the largest within the construction industry and can be broadly divided into environment and transport-related construction activities. While the environment segment includes dams, water supply, sewerage and solid waste treatment plants, the transport segment consists of roads, highways, bridges, ports and railways, airports etc.

The infrastructure segment is expected to witness rapid growth over the next five to seven years as the central and state governments' thrust on the development of urban and rural infrastructure intensifies. Factors like total infrastructure development outlay of INR 1,738 between FY02-07 (Tenth Five Year Plan), high government expenditure and increasing privatisation will continue to stimulate growth in the construction industry.

The sector is likely to receive prospective investments of Rs 3,000 billion over the next two years (2005-06 and 2006-07) — an over 25% increase from the estimated investments in the last two years (2003-04 and 2004-05). Based on the proportion of civil construction related expenses in each sector, it is estimated that these projects have a potential to translate into orders worth Rs.1,800 billion for the construction industry.

The table below reflects the expected investments in key areas of the infrastructure industry.

Table: Infrastructure investments

Real Estate Sector

Real estate, also called realty, covers residential housing, commercial offices, trading spaces such as theatres, hotels and restaurants, retail outlets, industrial buildings such as factories and government buildings. Real estate involves the purchase, sale, and development of land, residential and non-residential buildings. Almost 80% of real estate developed is residential space and the rest comprises of offices, hotels, malls and entertainment avenues.

The main players in the real estate market are the landlords, developers, builders, real estate agents, tenants, buyers etc. The activities of the real estate sector encompass the housing and construction sectors also.

The real estate sector in India has assumed growing importance with the liberalization of the economy. The consequent increase in business opportunities and migration of the labour force has, in turn, increased the demand for commercial and housing space, especially rental housing. Developments in the real estate sector are being influenced by the developments in the retail, hospitality and entertainment (e.g., hotels, resorts, cinema theatres) industries, economic services (e.g., hospitals, schools) and information technology (IT)-enabled services (like call centres) etc. and vice versa.

Key characteristics of the Indian real estate sector

The Indian real estate market is still in its infancy, largely unorganised and dominated by a large number of small players, with very few corporates or large players having national presence. The Indian real estate market, as compared to the other more developed Asian and Western markets is characterised by smaller size and higher prices.

1. Highly fragmented market dominated by regional players

Rapid growth in the last decade has seen the emergence of larger players that have differentiated themselves through superior execution and branding. The larger players are able to capitalize on their early mover advantage. However, these players continue to operate in local/regional markets. While these players are now initiating efforts to develop a broader presence, their 'home' markets continue to support the majority of their profitability.

2. Local know-how critical success factor in the development phase

One of the key reasons for emergence of local leaders is the criticality of local know how and relationships in ensuring successful and timely development. Each development is dependent on a number of local clearances (e.g., municipal corporation, water, electricity) that requires strong experience and relationships.

3. High transaction costs and significant cash transactions

The sector has been burdened with high transaction cost in the form of stamp duty that varies across the country (state-wise). These transaction costs have resulted in poor liquidity in this market. These transaction costs have led to significant cash transactions to reduce the stamp duty burden.

4. Residential development largely financed through mortgage loans

Most developers use mortgage for their residential projects. Apart from mortgages, the other key sources of funding are through high net worth individuals and large property brokers.

Growth outlook

The real estate sector in India is witnessing a wide spectrum of changes making India a preferred destination for real estate activity. Technology sector and the outsourcing phenomenon coupled with the demographic shift characterized by rising disposable incomes and increased consumer spending has changed the face of the commercial real estate market in India.

It is estimated to grow into a US \$90bn industry from the current US\$ 12bn industry in the next 10 years. By 2010, the industry is expected to grow to US\$45-50bn.

The main factors driving this growth are:

1. Rapid growth of organised retailing

Organised retail in India is at an inflexion point. The share of organized retail in the total retail pie is expected to increase from the current 3% to about 8-10% by 2010. The strong potential of the retailing industry has prompted entrepreneurs to make big investments in malls and expectations of penetration levels have triggered exponential growth in malls.

2. Growing commercial real estate requirements

In the commercial space, the business opportunity is led by the unprecedented outsourcing activity in India. The Indian IT/ITES sectors are in the midst of a significant growth phase and this strength in growth is expected to continue over the next five years. It has been estimated that there is a demand for approximately 75-85 mn.sq.ft. of IT space over the next five years.

3. Housing boom to drive demand for real estate

The changing demographics, lower interest rate regime, rising disposable incomes, stable property prices and fiscal incentives are the main drivers of the growth in the housing segment.

4. Real estate – an alternative investment class

Commercial real estate has emerged as a desirable investment option. On an average the returns from rental income on an investment in commercial property in metros is around 10.5%, which is the highest in the world.

The growth outlook of the sector has prompted investors to look at real estate as an investment asset. Investment in this sector has been growing steadily over the last four-five years. Apart from conventional investors, it attracts investments from corporates as well as from high networth individuals. The Indian realty sector is also beginning to see enhanced interest from Non-Resident Indians (NRI) aided by the easing of the FDI norms in real estate.

5. Government initiatives and FDI

Government initiatives have aided the sector by giving income tax benefits to the consumer, benefits to developers, initiated the rationalisation of stamp duty, repealed the ULCA in 9 states, are moving towards computerisation of land records and have taken initiatives towards permitting REITs apart from other developments. The Government has also initiated the National Urban Renewal Mission, which involves the renewal of urban facilities of satisfactory standards and made a budget allocation of Rs.55 bn.

The government has decided to allow FDI of up to 100% under the automatic route in townships, housing, built-up infrastructure and construction development projects (which would include, but not be restricted to housing, commercial premises, hotels, resorts, hospitals, educational institutions, recreational facilities), subject to fulfillment of certain conditions.

The gradual opening up of the sector for FDI by the Government and support of state governments to realty developments has further aided the sector by bringing in the much-needed investment, apart from professional players equipped with expertise in real estate development. The introduction of new technology and quality real estate assets is expected to have a demonstration effect on the local developers and lead to an improvement in the quality of related infrastructure.

Indian Real Estate Scenario

Delhi/NCR

Delhi/NCR is witnessing a lot of activity in the real estate sector.

There is a huge revamping exercise in the retail sector with traditional markets making way for new, organized retailing formats like departmental stores, hypermarkets, supermarkets and specialty stores. By end-2007, NCR region is expected to witness an influx of about 19.5 mn.sq.ft. of additional mall space. Of the total space being developed in the NCR and its surroundings, Gurgaon and Noida will account for 35% of the additional retail space by 2007. Land auctioning by DDA & MCD in prime residential and upcoming retail locations in Delhi has released new space for mall developments.

Current Demand

North West Delhi is also undergoing considerable change owing to growing retail activity in the region. By the year 2006, locations like Rohini, Pitampura, Shalimar Bagh and Rajouri Garden would witness an influx of over 2.0 mn.sq.ft. of additional retail space. With the Commonwealth Games scheduled to be held in Greater Noida in the year 2010, tremendous construction activity is underway in this micro-market.

The IT/ITES sectors accounts for a majority of the total demand from this sector, followed by the banking and other financial services (BFSI) sector with absorption levels of around 130,000 sq. ft. in the first quarter of 2005 calendar year).

Property rentals and values

The anticipated completion of the Delhi Metro by end-2005 is expected to induce fresh demand in the CBD area. Quoted base rents for office space in the CBD ranged between Rs. 58-105 per sq. ft. pm with a few prime buildings breaching this range. Quoted rentals for prime office spaces in Gurgaon ranged between Rs. 28-40 per sq. ft. pm while the base rentals in Noida ranged between Rs. 25-30 per sq. ft. pm.

Among the residential areas, developers are mainly targeting South Delhi i.e. Vasant Vihar, West End, Shanti Niketan and Anand Niketan. Many builders have shifted interest to 'B' grade areas like Panchsheel Park, Defence Colony, Anand Lok etc. Suburban towns like Faridabad, Noida, Ghaziabad – Indirapuram and Gurgaon have witnessed the concentration of new age development.

Bangalore

Bangalore is witnessing a steady upward trend in the demand for real estate from the commercial, retail and residential fronts. Bangalore is one of the fastest growing cities in the country recording a high annual population growth rate. Most of the new addition to population has resulted from immigration from other parts of the country on account of increased job creation in the city. The new population is characterized by double income, upper class families with high purchasing power. Their discerning tastes have opened avenues for new-age retailing in the city. It is estimated that the total retail stock in Bangalore by end-2007 will be to the tune of about 3.6 mn.sq.ft. The chart below shows the estimated addition in retail space in Bangalore by 2007.

Estimated new retail space in Bangalore by 2007

Current Demand

Bangalore is the largest single market for office property in the country. The second quarter of 2005 (calendar year) witnessed an overall space absorption of approximately 2.2 million sq. ft., a steep increase as compared to the absorption level recorded in the first quarter (1 million) of 2005 mainly on account of larger. The IT & ITES sector continued to be the most active demand driver for office space in Bangalore. CBD & Off- CBD locations recorded only 3.27% of the total absorption as compared to approximately 10% recorded in the first quarter. The suburban locations accounted approximately 40% of the total absorption this quarter. The peripheral locations continue to attract maximum demand with over to 1.2 million sq. ft. of absorption.

Developing locations

The locations slated to develop the fastest in the near future are Whitefield, Old Madras Road and the eastern quadrant of the Outer Ring Road, where new commercial and retail projects are being planned. With the work on the International airport having started, the real estate activity in the north of the city is expected to become more pronounced. The government is expected to allot lands to the IT industry for their campus developments in this area. The suburban and peripheral locations continue to be the most preferred office destinations. Future retail supply in the suburban & peripheral micro-markets is expected cross 1.0 mn. sq. ft. by 2007.

Demand for prime residential properties has increased and developers are targeting residential areas in the outskirts of Bangalore, such as Whitefield, Sarjapur Road, Kanakpura Road and Bannerghatta Road.

Property rentals and values

Pune

Pune is witnessing an increasing demand for real estate, especially with regard to office property.

A fast increasing population base, currently standing at 4.5 million and growing urbanization makes Pune a lucrative market for retailers in the organized retailing sphere. The cumulative retail stock by end-2007 in all these locations is expected to be over 2.5 mn.sq.ft. The chart below shows the estimated addition in retail space in Bangalore by 2007.

Furniture and Furnishing Industry

The home furnishings market consists of the sale, directly or through any retail channel, of furniture, carpets and other floor coverings along with household textiles and soft furnishings.

At a global level, unlike Europe and US, Asia-Pacific has steadily been increasing its share of the global home furnishing market. The Asia-Pacific market grew at a compound annual growth rate (CAGR) of 5.6% to US\$ 56.84 billion during the period 1999 and 2003, which was higher than the growth recorded by the global market. This growth was primarily led by the furniture sector, which stood at US\$ 30.47 billion in 2003.

Chart: Asia Pacific Home Furnishing market value forecast - 2003-2008

The Asia-Pacific home furnishing market is extremely fragmented with very few companies holding a substantial market share. The rest of the market is made up of small local or specialized businesses, which individually only hold a negligible market share. One of the strongest growing areas of the market is the luxury segment, a trend that is likely to continue as incomes rise.

India Furniture Industry

Overview

The furniture industry in India, is valued at Rs.17,500 crores. The industry is broadly divided into two segments, based on the end user catered to, viz. the residential segment and the office segment.

Among the types of furniture used, the office furniture segment is the largest in size and witnesses most of the technological innovation of the production. Consumer expenditure on furniture and furnishings amounted to about Rs 39 billion in 2002 and grew at a rate of 8% per year during 1999-2002, as can be seen from the table below.

Euromonitor estimates

The main drivers of this growth are the rising income levels of the average Indian and the increase in size of houses, facilitating higher demand for furniture. Higher incomes are enabling many to spend large amounts on creating an aesthetically pleasing and comfortable home environment. With the rapid growth of incomes, elaborate furniture and furnishings has become a means to demonstrate prosperity and a better lifestyle.

Health care - hospitals:

In this segment, we have provided turnkey solutions including building “Clean Room Areas” used for operation theatres, etc. which involve specialized construction. Besides, we have also done large floor plates (i.e. single floor spaces which are significantly large in horizontal size) and have also done hard finishes. A case in point is the Fortis Hospital at Mohali where we were required by design to achieve a continuous concrete pour for 36 hours of about 750 cubic meters of concrete. We also executed the in-situ (on the project site itself) mosaic floors in 100% white cement, which involved complex logistics of laying, polishing and finishing the same. It also involved specialized processes like antibacterial treatment for floors and ceilings, coving of flooring, dustproof construction etc. These processes were also required in respect of the operation theaters and ICCU’s. The construction of the entire hospital was completed within 18 months and the structure of the hospital was constructed within 10 months. Escorts Heart and Research Centre Hospital in Faridabad is another example of specialized construction techniques applied by us to perform contract works in the health care sector.

Our important projects in the healthcare and hospitality segment may be summarized as below:

Hospitality – hotels:

We have built high end hotels including woodwork, hard finishes and interiors and provided the entire civil works required for such hotels, including external finishes. The Wildflower Hall for Mashobra Resorts Pvt. Limited, in Kufri, Shimla required specialized construction techniques. In order to maintain and ensure smooth execution we fabricated the steel structure in the plains in the winter months and then transported the structure to the building site to the hills in the summer months. The columns, slabs and beams were a combination of structural steel fabrication and concrete. The steel was fabricated, erected on site, fabricated beams were welded across and then concrete was poured for the slabs. In the end all the exposed structural steel was encased in concrete to give the building a “2 hours fire rating”.

We have also constructed the Hyatt Regency hotel in Goa where we were required to execute the civil works and make innovations on site to execute the work in cornices, wood works, floors, basements etc. We also executed substantial work for the external wood work in respect of canopies, trellises, including making wooden trusses. We have built a Hotel for the Taj Group at Jodhpur in the distinctive style of Rajasthan. Our work included executing the plaster in old Rajasthan cornices, work on the structure, brick masonry, stone pillars, stone “todis” (brackets) and other paint work.

We have constructed nearly the entire process building, storage and mixing facilities, floorings, etc. for Biocon Limited at Bangalore involving composite structure using concrete and structural steel. The other noteworthy project is a biscuit manufacturing facility for Britannia Industries Limited at Rudrapur.

Retail/ Multiplex- mixed use buildings

Multiplex structures are complex to build due to design complexity with respect to positioning of screens, steps, floor levels, screen rooms, sound proofing the rooms, using sound absorption fabrics, laying of fire proof paints, chemicals etc on the walls etc. We have renovated and constructed the PVR Anupam at Saket, a Mall at Raja Garden.

We are constructing the complete structure for building malls for the Select Group which is developing a built up area of 1.3 million sq. ft. in Saket, New Delhi. We have also been engaged by them for certain projects in the core areas for the retail, multiplex, service apartments, office space and hotels which is part of the abovementioned project. We have a similar ongoing contract with the DLF group involving a total built up area of over 1.3 million sq ft. and are also executing a project for construction of a retail mall with a multiplex at Shalimar Garden, New Delhi for the "Business Park Town Planners Group".

Types of contracts and the process for execution of contracts

Types of contracts

The construction services provided by us consists of the erection of structures and allied services which include planning and scheduling the manpower, equipment, materials and appointment subcontractors required for the timely completion of a project in accordance with the terms, plans and specifications contained in the construction contracts and allied documentation. We provide these services by using fixed price and cost plus fee contracts and, to a lesser extent, construction management or design-build contracting arrangements. These contract types are discussed below:

Fixed price contracts (“FP Contracts”): These are fixed unit price contracts and are generally used in civil construction projects for the government through the competitive bidding process and to a lesser degree in the private sector and generally require us as the contractor to provide all the resources required to complete a project for a fixed sum or at fixed unit price, except for cost of steel and cement (which represents the major cost of construction material). FP Contracts represent a significant portion of our private sector civil construction projects. Design-build/ turnkey projects (i.e. projects where we design the building and build the building in totality) are also generally performed under a FP Contract. A major portion of the contracts entered into by us are FP Contracts. It may however be noted that some of our fixed price contracts have a component of cost plus works, akin to a Cost Plus Contract, for customized fittings or electrical / electromechanical fittings.

Cost plus fee (“Cost plus Contract”): These contracts provide for reimbursement of the costs required to complete a project plus a stipulated markup as profit.

Important considerations reflected in construction contracts

- **Impact of variation of cost of materials:** Some contracts entered into by us provided that all prices are fixed and no price variations would be paid by the client on what so ever account. In most of the cases the prices of steel, cement does increase in variably and we can not factor the same in while quoting for the work. There could be substantial increase on these two components which may vary by upto 40% of the price of the respective components. However, we try and ensure that our contracts provide that escalations in prices of steel and cement are payable by the client. Presently a majority of our contracts contain this stipulation.
- **Impact of change in the tax rates during currency of contract:** In the past, some contracts did not provide for suitable price adjustment clauses consequent to variations in tax rates in respect of works contract tax/value added tax and service tax during the currency of the contract. In order to mitigate this risk, currently, in most of our contracts, there is a clause providing for price adjustments in the event of additional tax implications as specified above.

Process for Execution of Contracts

Project Identification

We identify potential projects from a variety of sources, including advertisements by central, state and local governmental

B. L. KASHYAP AND SONS LIMITED

agencies, through the efforts of our business development personnel and through meetings with other participants in the construction industry such as architects and engineers. After determining the availability of projects, we decide on which projects to pursue based on as the following, among other factors:

- Project size
- Duration
- Availability of personnel
- Current backlog, competitive advantages and disadvantages
- Prior experience
- Reputation of the contracting agency or owner
- Source of project funding
- Geographic location
- Type of contract

Project Bidding

After deciding which contracts to pursue, we generally have to complete a prequalification process with the applicable agency or customer. The prequalification process generally limits bidders to those companies with operational experience and financial capability to effectively complete the particular project(s) in accordance with the plans, specifications and construction schedule.

Our bid estimation process typically involves three phases:

Phase I: Initially, we perform a detailed review of the plans and specifications, summarize the various types of work involved and related estimated quantities, determine the project duration or schedule and highlight the unique and risky aspects of the project. After the initial review, we decide whether or not to continue to pursue the project.

Phase II: We perform the second phase of the estimating process which consists of estimating the cost and availability of labor, material, equipment, subcontractors and the project team required to complete the project on time and in accordance with the plans and specifications.

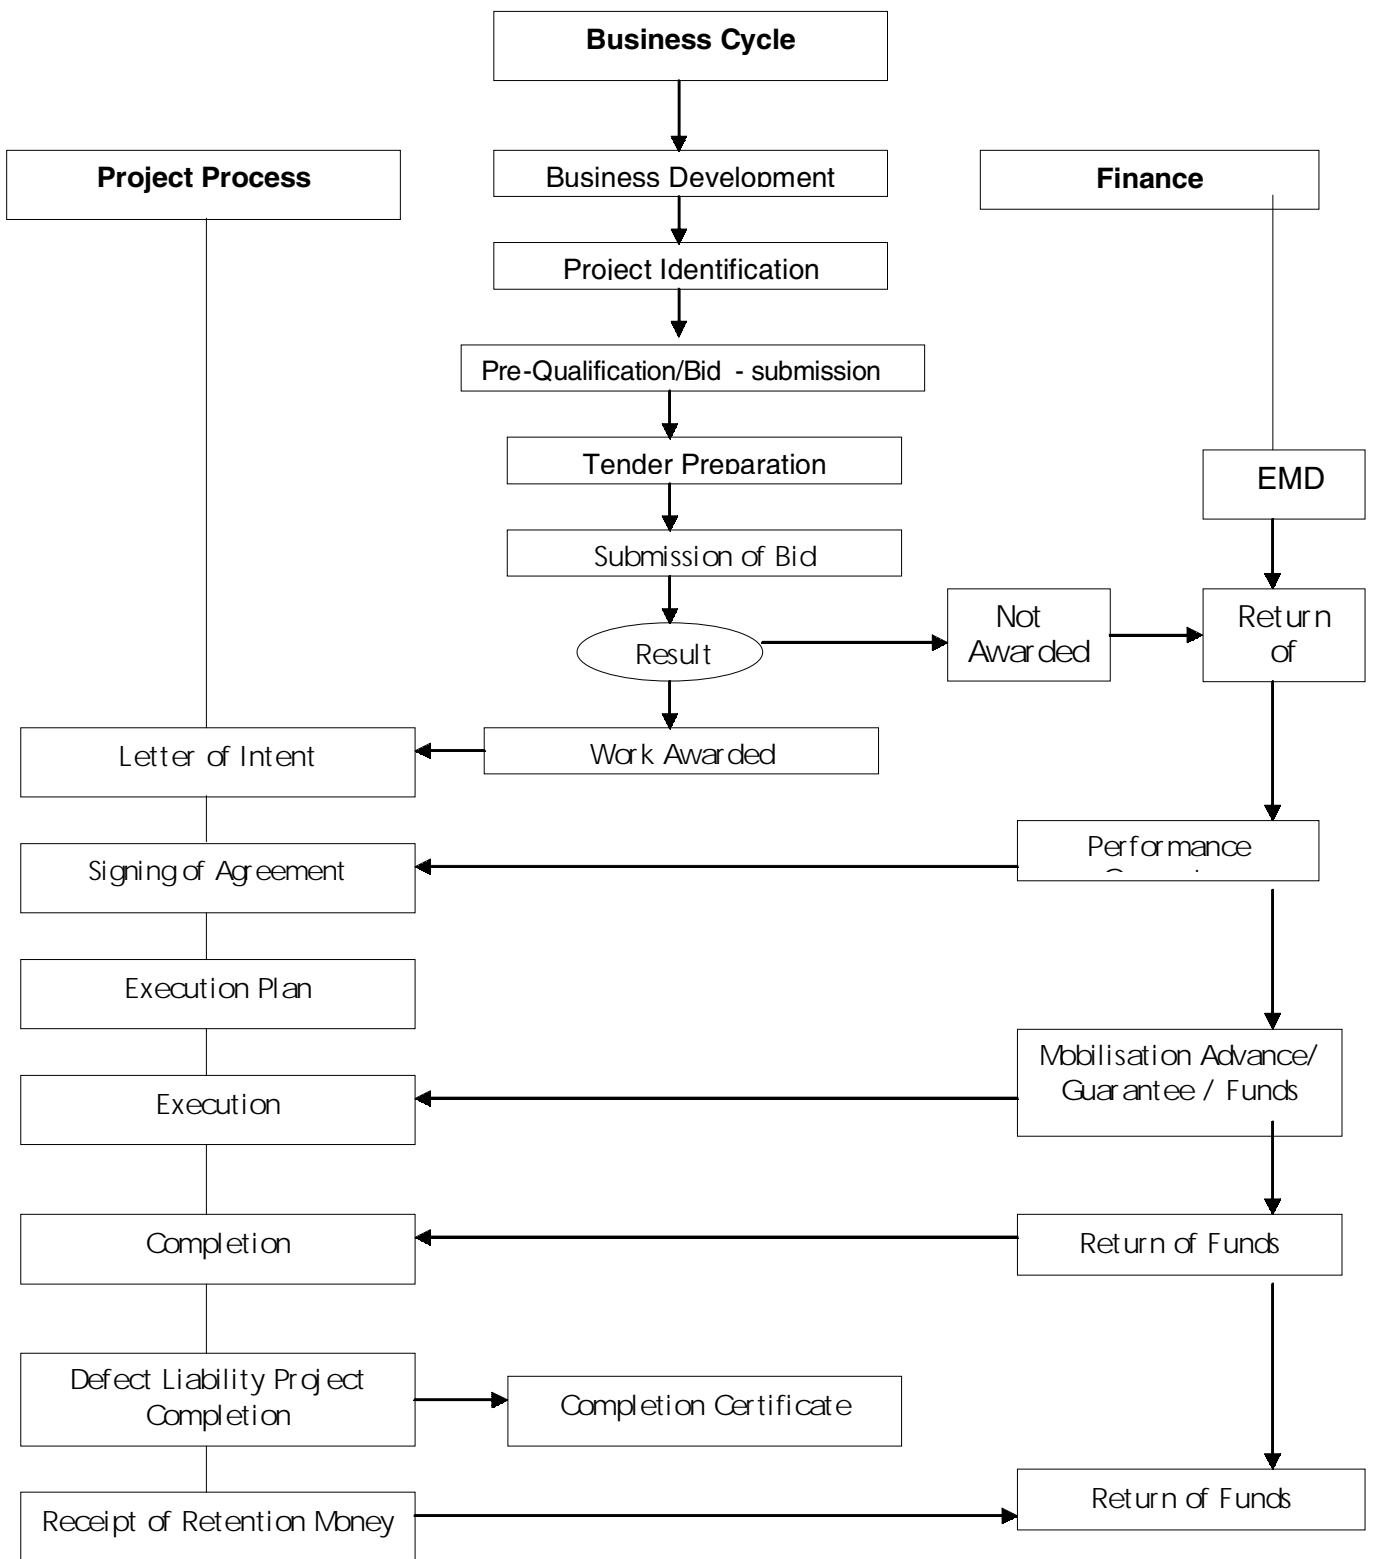

Phase III: The final phase consists of a detailed review of the estimate by management including, among other things, assumptions regarding cost, approach, means and methods, productivity and risk. After the final review of the cost estimate, management adds an amount for profit to arrive at the total bid amount.

Award of the Contract

Requests for proposals or negotiated contracts with public or private owners are generally awarded based on a combination of technical capability and price, taking into consideration factors such as project schedule and prior experience.

Project Planning and Execution

The various stages in project planning and execution may be represented by means of a flowchart as produced below:

The important aspects of project planning and execution typically would involve the following aspects:

- **Design Assessment:** Once we get a letter of intent from the client, we arrange a preliminary “kick off” meeting with client, together with the architect, structural consultant, and project manager of owner and other important participants. We study the design concept of the owners, along with advance copies of the relevant drawings and plans and make value engineering assessment, considering our scope of contract and the parameters. We give a formal approval to the architect / structural consultant of the owner for making further drawings. We discuss and assess the ways the methodology to construct and the requirement of plant and equipment versus the design parameters. Detailed plans are worked out at this stage by us for commencing actual work. The layout for the placement of equipment, offices, stores, offices is discussed and agreed upon based on which the work for the project commences. During the currency of the project a detailed weekly assessment is done on the progress of the project and requirement for drawings and design for the same are prepared in order to ensure timely completion of the project.
- **Material Planning:** Based upon the available drawings and time frame, we calculate the requirement of materials under three sub heads: Company Assets (new and available), Basic Materials (OPC, Steel, Aggregates, Stones, Tiles etc.) and Consumables (Shuttering Plywood, Wood, Nails etc.). This consolidated requirement of materials along with tentative schedule is then forwarded to the Procurement Department of our Company for identification and negotiation with vendors. Materials are sourced or procured directly from manufactures, their agents or from reputed sources, quality checked, warehoused at our go-downs or delivered to construction sites as required. Dedicated site teams engaged in primary construction activities, linked together by communications and information technology, are supported by back end teams to ensure timely implementation of the project and quality of the highest standards. The negotiations are done with approved vendors on the material specifications that are provided to us as part of the construction contract. The materials department of our Company is given an indicative price for materials to be purchased and the dates and time when they are required. We identify the requirements, delivery schedules and other details in respect of the materials and monitor its delivery, quality and safety. We ensure that optimum quantities of materials are not kept in stock in order for efficient use of working capital..
- **Manpower Planning**Our Company manages a combination of in-house teams, partnered resources through vendors and outsourced services seamlessly, ensuring smooth implementation of projects irrespective of size, complexity or deadline. The requirement for personnel is determined on the basis of the scope of work and timelines for delivery of the project. A separate plan is made for works to be carried out by sub contractors and specialized agencies. The screening of manpower to be hired for the various facets of construction is a continuous process which is carried out throughout the currency of the project, depending on the stage of the project and hire vendors who have had experience in the required field. We issue work orders to these vendors and sub contractors. We also depute one of our qualified senior personnel to head the project as ‘Project Co-ordinator’ from the head office. Senior site supervisors for all processes, elaborate documentation and reporting, in-organization quality audits, scheduled management visits and periodic reviews ensure quality workmanship, finishing, detailing and on-time completion of projects. The man power planning and arrangements are undertaken by the Project Coordinator in consultation with the ‘Project Manager’ (who is in charge of the construction project on site).
- **Project Scheduling and Monitoring:** Our Company uses authorized software for preparing the project schedules. Detailed diagrams and plans are made in consultation with the entire project team which are evaluated by the Project Director for follows up the same with the project team during the execution. Weekly meetings are held at the project site for reviewing the project with the clients, the Project Mangers and our project team.

During the construction phase of a project, we monitor our progress by comparing actual quantities completed and costs incurred as on date with the project schedule and budgeted amounts periodically, on a monthly basis, and prepare an updated estimate of the materials and cost involved in the remaining contract work and assess the remaining contract value. The “Project Director” designated by the head office has the role of overall supervision and monitoring the project and is ultimately responsible for the monitoring and completion of the project on acceptable parameters.

- **Project Completion:** On the completion of the project we apply for a “completion certificate” from the clients. On receipt of the completion certificate, we apply for a completion/ handing over the building. A detailed handing over list is made in accordance with the contract. The client/ his representative then inspects the building, and gives us a list of defects to be corrected before the formal handing over of the property. We complete the defects as identified by them and a physical verification and certification is done by the client. Subsequently, a formal handing over is done to the client, and in some case a partial handing over is also done so that the client can give

his building to the buyers or such other persons as he may determine for the purposes of executing their fit outs. We submit our final bill with all details, certificates, enclosures etc. as per the terms of the contract once the work is completed. Finally, we clear the project site of all our materials, offices, machinery and equipment..

RISK MANAGEMENT

Some of the key factors which expose our business to risk and our assessment and management of the same are provided below:

Risks arising from increase in cost of materials

While our business may experience some adverse consequences if shortages of materials develop or if prices for materials, labour (in certain cases) increase excessively, provisions in a majority of our contracts often shift all or a major portion of any adverse impact to the customer. On fixed price contracts, which form a majority of the contracts entered into by us, we attempt to insulate ourselves from the unfavorable effects of inflation by incorporating escalating wage and price assumptions, where appropriate, into our construction bids and by obtaining firm fixed price quotes from major subcontractors and material suppliers at the time of the bid. As stated above, since most of the contracts are FP Contracts, excluding the price payable on account of steel and cement, which are payable by the client on the basis of actual cost, we try to limit our risk exposure to that extent.

Construction and other materials used in our construction activities are generally available locally from multiple sources and, in our experience, have been in adequate supply.

Risk arising from modifications in our projects

During the normal course of most projects, the owner and sometimes the contractor, i.e. our Company initiates modifications or changes to the original contract to reflect, among other things, changes in specifications or design, method or manner of performance, facilities, equipment, materials, site conditions and period for completion of the work. Generally, the scope and price of these modifications are documented in a “change order” to the original contract and reviewed, approved and paid in accordance with the normal change order provisions of the contract. Typically, the variations are captured in the construction contract where we describe the percentage of variations permitted and the agreed mechanism for determination of the costs in relation to these variations.

The process for resolving claims vary from one contract to another but, in general, we attempt to resolve claims at the project supervisory level through the normal change order process or with higher levels of management within our organization and the customer’s organization. Once a bill for change orders is raised by us, at such periods as is specified in the contract, the representative of the owner typically certifies these bills, together with certain modifications, on the basis of which we raise a final invoice on the clients for payment of the bill. In our experience, with private clients, in recent years, a small percentage of this bill is paid within a short time and the rest of the bill is usually cleared after another month. Depending upon the terms of the contract, claim resolution may employ a variety of other resolution methods, including mediation, arbitration or litigation. Since inception we have had only one litigation in respect of modification in our projects. For details please see the section titled “Outstanding Litigation and Material Developments” beginning on page 168.

Risk arising from cost and time overruns

In any project, if the manpower and material resources are not appropriately allocated, or if immediate requirements for the same are not met, it could lead to time and cost overruns which could impact our results of operations. In order to mitigate this risk, we have a central project monitoring team which has the responsibility of ensuring proper allocation of resources in an optimal manner. This team works directly under the Director Projects.

Risk arising from accidents

Our safety and health approach includes safety systems, on and off site training and a behavior-based safety program. Our commitment to zero accidents extends to every aspect of a project, from planning to completion, and from the boardroom to the manpower on site. Every employee has stop-work authority—if it’s not safe, don’t do it.

We also work closely with our subcontractors and construction partners to enable them to adopt and mirror our commitment to safety and health. The result is exceptional safety performance, even in hazardous work environments across locations.

Properties

We have taken approximately 60 properties on company lease/ rent for our employees. These rent agreements may be understamped and unregistered. We are in the process of formalizing the arrangements in respect of our regional office

B. L. KASHYAP AND SONS LIMITED

in Bangalore. Apart from these properties we have no other material lease or rent agreements and do not own any immovable property in respect of any of our project sites.

Insurance

We insure our construction projects, workmen, plant & machinery and other assets. The various kinds of insurance policies we take are as follows:

- Contractor's All Risk Policy broadly covers material damage to the contract works and loss caused in respect of third parties liability. These are individual policies which are specific to each contract and depend on the value of the contract.
- Workmen's Compensation Insurance Policy covers personal injury by accident or disease suffered by employee arising out of and in course of employment of the Company. These are policies for employees in respect of each project undertaken by the Company.
- Plant and Machinery Policy cover individual plants and specified items of machinery.
- Miscellaneous and Special Types of Vehicles Policy are individual policies covering specified vehicles.
- Standard fire and special perils policy on office equipment and other contents of the head office and regional offices, covers damage caused due to fire, lightning, storm, cyclone, flood and inundation, earthquakes (fire and shock), explosion, riot, strike, and terrorism damage.
- Standard burglary insurance on office equipment in the head office and regional offices.
- Insurance of cash in transit – A policy extending a cover of Rs. 1 million covering policy covering transit from Canara Bank, Indiranagar, ICICI Bank, Indiranagar, Vijaya Bank, Infantry Road to various offices and work sites.
- Public liability insurance –A policy extending a cover of Rs. 1 million for a particular construction project, as was required by the terms of the contract.
- Marine Cargo Transit Insurance- A policy extending a cover of Rs. 1 million for transit anywhere in India.
- Keyman Insurance Policy- A policy extending a cover of Rs. 9 million for Mr. Vineet Kashyap, our Managing Director and Promoter.

Human Resources and Employee Training

Our Company has a team of around 250 engineers on its rolls, supported by an additional of approximately 300 odd skilled foremen and supervisors. We advertise in national dailies for employment. Recruitment of personnel in different categories are made through the human resources department of our Company. We train new employees at various project sites and selected employees are then given a larger responsibility and are allocated to a larger project site. We also do campus interviews at regular periods and hire people who are then trained them at our existing sites in various areas of construction. Our emoluments for our staff are performance based. Employees are evaluated on a yearly basis for their performance on specified parameters. We provide employees with benefits as prescribed by law, such as provident fund, gratuity and ESI, accident insurance coverage and medical coverage.

Environmental Matters

Our constructions and operations are subject to governmental, state and municipal laws and regulations relating to the protection of the environment, including requirements for water discharges, air emissions, the use, management and disposal of solid or hazardous materials or wastes and the cleanup of contamination. However, all the necessary approvals and environmental clearances for the construction for the project are to be procured by the owner and undertakings, as may be required, in this connection are to be given by the owner/developer to the environmental or pollution control agencies.

Further as part of our environmental policy, we:

- Communicate and instill an organizational commitment to environmental excellence in all our activities;
- Protect the environment by designing, constructing, and operating projects that avoid or minimize adverse environmental impact;
- Provide technical and economic information and advice to our customers on engineering and construction methods that prevent or minimize pollution;
- Identify potential environmental issues early and work with customers to find and implement solutions; and
- Assist customers in the process of complying with environmental regulations.

Information Technology Systems

We are in the process of implementing an ERP package suited for our business requirements. Once the ERP package is implemented, we believe that it would enable us to optimize our resource planning and allocation. Currently, all our senior executives are equipped with laptop computers and are connected through mobile internet facility wherever they travel in the course of their professional duties.

INTERIORS / FURNISHINGS BUSINESS

The interiors of a place refer to its look and ambience in order to give effect to a designer's plans and ideas in relation to a structure. We operate in the interiors and furnishings business through our wholly owned subsidiary BLK Furnishers.

Depending on the nature of work involved in a project, there are various processes/subheads that the work is may be subdivided into. The major heads are as specified below:

- **Flooring:** Includes stone, granite, tiles, carpets, wooden, vinyl elements depending on the location for installation.
- **Ceiling:** Refers mainly to a false ceiling given under the main slab, and could be in the form of gypsum board, plaster of paris, acoustic tiles, metallic tiles, wood veneers.
- **Partitions & Paneling:** These come in the form of gypsum board, laminates, veneer, glass, fabric, or a combination of these to form what we also know as modular or factory made.
- **Fixed Woodwork:** Includes the door frames, doors, windows and fixed storages.
- **Finishes:** The final paint or polishing that needs to be done on all the elements specified above. The paint could be plain, colored or textured depending on taste specifications and ambience requirements. This forms a critical aspect of the interiors in order to create the appropriate ambience.
- **Loose furniture:** Comprises various tables, chairs, sofas, bed sets. These are made using wood, steel, glass, fabric, leather or any new materials that may be commercially available.
- **Soft furnishings:** Refers to the curtains, which may be venetian/vertical/roller blinds or upholstery.
- **Accenting:** Forms the aesthetic element of a project, and includes pictures, artifacts, trophies, or any such item that can portray the personality of the person/place.
- **Signage:** Refers to the brand or logo of the client.

The last few years have also witnessed a growth in the furniture and furnishings industry. For details please refer to the section titled "Industry" beginning on page 56.

Through our furnishings unit, we have tried to ensure a continuous, timely and reliable supply of furnishings according to the specifications of our customers and we believe we have developed a reputation of timely delivery.

Our Competitive Strengths

We provide a one stop construction solution on “design build” model

We provide a wide range of construction services from erection and civil work to electromechanical and allied services. In addition, we provide interiors and furnishings through our wholly owned subsidiary BLK Furnishers. Consequently, we are able to provide a wide range of services relating to construction and finishing of a structure and deliver a fully furnished building to the client. For instance, our ongoing IFFCO project is on design build basis wherein we are providing an office setup in which the client will commence operations on delivery, and are providing the entire civil, electrical, plumbing, fire fighting, air conditioning, intelligent building management systems and all furniture and fit outs. This enables the client to avoid the additional time and cost overruns. We believe that our ability to provide these turnkey solutions gives us an edge over our competitors, increases our flexibility, and also provides higher profit margins than we would have enjoyed had we been unable to offer these additional services. In addition, we benefit from our ability to offer a wide range of services since, when we place bids for contracts, we are able to bid as an entity able to deliver turnkey projects. This, we believe, gives us an advantage over construction companies who are not able to provide these additional services.

Our revenue is primarily derived from business emanating from the private sector

We primarily cater to the private sector including reputed corporates such as IBM (for Golf Links Software Park Private Limited), Microsoft Corporation (for Golf Links Software Park Private Limited), Oberoi Hotels, Taj Hotels, Hyatt, Fidelity Business Services Private Limited, Cadence Designs Systems (India) Private Limited, Adobe Systems India Private Limited, etc. In our experience, contracts in the private sector are largely awarded based on criteria like timely delivery, quality of performance, strength of the execution team, reliability, etc and not just on the basis of the lowest price quoted. We believe that our reputation with the private corporate sector enables us to command a premium position in the construction industry and have led to corporate houses like Cadence Designs Systems (India) Private Limited, Adobe Systems India Private Limited, Hughes Software Systems, HCL Perot Systems Limited and developers like Embassy, Brigade, Mantri, Akme becoming our repeat customers.

Further, it has been our experience that the private sector has largely normally made payments on time and we receive payments according to the terms selected and agreed upon, which are normally less rigid than the contracts in the public sector. Further, dispute settlement are often mutually settled. The terms of a contract with a private party, in our experience, typically lends itself to more flexibility are more flexible and are open to discussions may be discussed while finalizing the project.

In our experience the private sector has offered us more acceptable payment terms, recognition and the flexibility to rectify pricing errors, in the event that we have quoted an inaccurate price, in addition to flexibility of contract and payment terms. We have had negligible bad debts to be written off since inception.

The debtors turnover ratio of our Company in fiscal years 2003, 2004 and 2005 are summarized below:

Fiscal Year	Debtors / Sales x 365 (Days)
2003	67.14
2004	54.84
2005	68.62

Proven performance within contractually stipulated time limits

We have consistently adhered to performance and time parameters stipulated in respect of construction projects executed by us. This has been made possible due to a capable, efficient, qualified, professional team which has been built over the years. As can be seen below, despite a significant increase in our order book we have had a consistent revenue turnaround cycle.

Fiscal Year	Total Order Book (In Rs. million)	Average turnaround cycle* (no. of days)
2003	212.43	162.22
2004	354.08	162.22
2005	728.00	156.65

* Sales / order book x 365

Efficient deployment of manpower, materials and equipment

Our efficiency in execution specifically in respect of efficient deployment of manpower, material and equipment enables us to generate higher revenues and helps us to control our inventory costs. The rapid use of equipment controls our inventory costs and also increases the turnover in the respective projects. This also enables us to have lower overheads, increases our profitability and turnover because we are able to use the same equipment/ and manpower at another project at a faster pace.

Ownership of modern concreting/shuttering equipment

We own modern equipment and shuttering materials. It has been our experience that in most cases, the cost of hiring equipment over a period of time is high, and hence we believe that ownership and usage of modern concreting/shuttering equipment results in a cost advantage for us.

Experienced Promoters with proven track record

The Kashyap family entered the business of construction services in the year 1978. The current Promoters, Vinod Kashyap, Vikram Kashyap and Vineet Kashyap are also directors on the Board of our Company, and have been in the business of construction for over 25 years. Our management team led by our Promoter directors has gathered substantial experience and expertise in various aspects of the business of construction. Further, the prevalent organizational hierarchy of our Company enables the management to take quick and efficient decisions to execute construction projects within contracted timelines. We believe that this enables us to meet expected standards of quality and efficiency.

Highly experienced, skilled, qualified and dynamic team, and low attrition rates–

We have, over the past number of years, developed and built a team of capable and qualified personnel who oversee and manage the various facets of our Company's operations. Our team comprises of key management personnel who are veterans in the construction industry, many some of whom have spent over 25 years in the industry. They are experienced in executing quality projects within the contracted time frames. The attrition levels of key managerial personnel have been low. For details of changes in key managerial personnel over the last three years please see the section titled "Our Management" beginning on page 80.

Our senior key managerial personnel have been with our Company for more than 15 years, and we believe that this reflects that we have proven our ability to retain and motivate and re-skill our employees.

High standards of integrity and efficiency

Our management believes in maintaining high standards of integrity and honesty which we believe has resulted in generating repeat business and has also built a reputation for honesty. We use appropriate materials in accordance with the specifications contractually agreed to by us and we meet the contractually agreed specifications for the construction projects executed by our Company.

Business/Growth Strategy

We are currently focused on commercial, industrial, corporate and residential construction. We primarily service the private sector and have executed projects for reputed corporate houses. We have also executed a variety of end-use structures including hotels, hospitals, office buildings, residential complexes and industrial plant buildings. We would continue to focus on the existing range of construction services that we offer with specific emphasis on the following factors as a business and growth strategy:

- Increasing the scope of work for each order by adding hard and soft finishes and electro mechanical services and associating with larger projects.
- By ensuring association with reputed corporate houses and executing important projects to their satisfaction, which enables us to build our Company's brand name and image in the construction industry.
- To build structures which have cutting edge design and specialty structures.
- Diversify and undertake projects in various industries.
- Quality and timely delivery in the execution of projects across industry segments and geographical locations.
- Extending our activities to other areas such as construction of residential townships and entering real estate development through our subsidiary "Soul Space Projects Limited" in Bangalore, Pune and other sub metro towns and cities.
- Providing a diversified range of services including furniture and furnishings enabling us to bid for projects in a comprehensive manner and to provide a one stop solution to clients.

B. L. KASHYAP AND SONS LIMITED

Increasing the scope of work for each order and associating ourselves with larger projects

It is our constant endeavor to be associated with larger projects. For instance, we are focused on construction of residential complexes which are of a built up area of over 300,000-400,000 sq. ft. and in respect of which the contract value would typically exceed Rs. 1,000 million. We aim to continue to be associated with large projects in industrial construction like the diesel plant for Maruti Udyog Ltd. having a contract value of Rs 265 million.

We try to increase the scope of work in each order to add value to the project, for e.g. in the case of the IFFCO headquarters in New Delhi where, besides civil constructions we acted as the principal contractor for the complete construction, interiors and mechanical services.

The details of our order book in the last three fiscal years may be summarized as below:

Fiscal Year	FY03	FY04	FY05
Total Order Book (In Rs. million)	2124.6	3540.80	7280.00
Number of Orders	47.00	45.00	50.00
Average Order Size (In Rs. million)	45.19	78.70	146.00

Association with reputed corporates

We have been associated with reputed corporates including IBM (for Golf Links Software Park Private Limited) , Microsoft (for Golf Links Software Park Private Limited), Oberoi Hotels, Taj Hotels, Hyatt, Fidelity Business Services Private Limited, Cadence Designs Systems (India) Private Limited , Adobe Systems India Private Limited amongst others. We have also secured repeat business from various corporates for whom we have constructed structures such as Escorts Limited, Hughes Escorts Communications Limited and their group companies, HCL Perot Systems Ltd. and Maruti Udyog Limited and their group companies. Our growth strategy also involves continuing to service reputed corporate clients in the future since we believe it would enhance our brand image and credibility in the construction industry. We are currently executing projects for corporates such as IFFCO, Maruti Udyog Limited and Uppal Housing Private . Ltd.

Building structures which have cutting edge design and structure specialties.

Our strategy is to build a wide variety of structures which have unique design and structural specialties such as our construction in respect of the plants of Yamaha at Surajpur where we fabricated specially designed trusses and completed special roofing in ferro-cement work. The structure was in the shape of a square of an area of approximately 20 sq. meters, which was built on the ground and subsequently was lifted with the help of winches and erected at a height of about 7.60 meters. We believe that constructing such specialized structures would enhance our range of construction service offerings and assists us in securing specialized construction projects.

Undertaking projects in a variety of sectors

We have, in the past, catered to a range of industries which has contributed to increasing our technical know how, capabilities and range of service offerings. This has also enabled us to de-risk our business model since we are not significantly dependent on any particular industry or a set of industries for our future revenues. In the absence of growth in any industry, we believe that we have the capability of mobilizing our resources to such industries as may be required thereby ensuring continuity of business. We aim to continue to diversify our activities in various industries.

Thrust into real estate

Our foray into real estate is through our subsidiary “Soul Space Projects Limited” and we plan to initially focus on the residential sector. We believe that we can use the expertise and knowledge gained in the course of executing our various projects in our proposed thrust into the real estate sector. In the initial stages, we plan to primarily cater to markets in Bangalore and Pune. We plan to use our association with Akme Projects Limited, to assist in our foray in Bangalore. We believe that our brand and credibility would aid in the development and marketing of residential complex.

% increase		(4.53)	88.57

It is our constant endeavour to derive incremental revenues from the existing asset base. Our asset turnover ratio has increased from 6.72 in FY03 to 10.76 in FY05. We have reduced the dependence on external borrowings, we have also been able to grow the business significantly. Correspondingly, we have also increased the efficiency of capital employed which is evident by the increasing capital output ratio; our capital output ratio has increased from 4 in FY03 to 8.62 in FY05. In FY04, the prices of major raw materials witnessed a significant increase which led to a decline in the EBITDA margin by 0.52%. Since FY05, we have hedged ourselves against these increases by clauses incorporated in our contracts. For details, please see the section titled "Our Business" beginning on page 53. Further, we have been choosing co-location projects (projects situated within a limited area) and multiple projects with single client leading to lower overheads and major contract costs. These factors have contributed to an increase in the EBITDA margin by 39.89% to 8.11% in FY05.

Issuance of Letter for Additional Margin Money

In case of QIB Bidders, who have submitted their Bids with the QIB Margin Amount, additional Margin Amount may be called for by the Company, in consultation with the BRLM. The amount of such additional Margin Amount called for shall depend on the level of subscription in various categories, as determined on the basis of the electronic registration of Bids. Issuance of CAN

- (a) Upon approval of the basis of allotment by the Designated Stock Exchange, the BRLM or the Registrar to the Issue shall send to the members of the Syndicate a list of their Bidders who have been allocated Equity Shares in the Issue. However, Bidders should note that the Company shall ensure that the date of Allotment of the Equity Shares to all Bidders, in all categories, shall be done on the same date.
- (b) The BRLM or the members of the Syndicate would then send the CAN to their Bidders who have been allocated Equity Shares in the Issue. The dispatch of a CAN shall be deemed as a valid, binding and irrevocable contract for the Bidder.

Allotment Reconciliation

After the Bid/Issue Closing Date, an electronic book will be prepared by the Registrar to the Issue on the basis of Bids received. Based on the electronic book, QIB Bidders will be sent a CAN indicating the number of Equity Shares that are being allocated to them. However, within a few days thereafter but prior to the Board meeting for final allotment of Equity Shares in the Issue, the Registrar to the Issue will also prepare a physical book, which may be different from the electronic book. This is because certain applications in the Non-Institutional Portion and Retail Portion may be rejected due to non-receipt of funds, cancellation of cheques, cheque bouncing, incorrect details, technical rejections, etc, and these rejected applications may not be reflected in the electronic book but will be reflected in the physical book. As a result, additional Equity Shares may be available for allocation in the QIB Portion provided the QIB Portion is oversubscribed and the Non-Institutional Portion and Retail Portion are not fully subscribed. In such event, QIB Bidders may receive an increased allocation of Equity Shares and such increase in allocation will be reflected in a revised CAN that is sent to QIB Bidders.

OTHER INSTRUCTIONS

Joint Bids in case of Individuals

In case of joint Bids, all payments will be made out in favour of the Bidder whose name appears first in the Bid cum Application Form or Revision Form. All communication will be addressed to the first Bidder and will be dispatched to his or her address.

Multiple Bids

A Bidder should submit only one Bid (and not more than one) for the total number of Equity Shares required. Two or more Bids will be deemed to be multiple Bids if the sole or First Bidder is one and the same.

In case of a Mutual Fund, a separate Bid can be made in respect of each scheme of the Mutual Fund registered with SEBI and such Bids in respect of more than one scheme of the Mutual Fund will not be treated as multiple Bids provided that the Bids clearly indicate the scheme for which the Bid has been made.

The Company reserves the right to reject, in our absolute discretion, all or any multiple Bids in any or all categories.

Where Bid(s) is/are for Rs. 50,000 or more, the Bidder or in the case of a Bid in joint names, each of the Bidders, should mention his/her PAN allotted under the I.T. Act. **The copy of the PAN card(s) or PAN allotment letter(s) is required to be submitted with the Bid cum Application Form.** Applications without this information and documents will be considered incomplete and are liable to be rejected. **It is to be specifically noted that Bidders should not submit the GIR number instead of the PAN, as the Bid is liable to be rejected on this ground.** In case the sole/First Bidder and joint Bidder(s) is/are not required to obtain PAN, each of the Bidder(s) shall mention "Not Applicable" and in the event that the sole Bidder and/or the joint Bidder(s) have applied for PAN which has not yet been allotted each of the Bidder(s) should mention "Applied for" in the Bid cum Application Form. All Bidders are requested to furnish, where applicable, the revised Form 60 or Form 61 as the case may be.**

Unique Identification Number ("UIN")

With effect from July 1, 2005, SEBI had decided to suspend all fresh registrations for obtaining UIN and the requirement to contain/quote UIN under the SEBI MAPIN Regulations/Circulars vide its circular MAPIN/Cir-13/2005. However, in a recent press release dated December 30, 2005, SEBI has approved certain policy decisions and has now decided to resume registrations for obtaining UINs in a phased manner. The press release states that the cut off limit for obtaining UIN has been raised from the existing limit of trade order value of Rs.100,000 to Rs.500,000 or more. The limit will be reduced progressively. For trade order value of less than Rs.500,000, an option will be available to investors to obtain either the PAN or UIN. These changes are, however, not effective as of the date of the Draft Red Herring Prospectus and SEBI has stated in the press release that the changes will be implemented only after necessary amendments are made to the SEBI MAPIN Regulations.

- At least 50% of the Issue shall be Allotted to the QIB Bidders, failing which the full subscription monies shall be refunded.
- Bids received from the QIB Bidders at or above the Issue Price shall be grouped together to determine the total demand under this category. The Allotment to all the QIB Bidders will be made at the Issue Price.
- The Issue size less allocation to Non-Institutional Portion and Retail Portion shall be available for proportionate allocation to QIB Bidders who have bid in the Issue at a price that is equal to or greater than the Issue Price.
- However, eligible Bids by Mutual Funds only shall first be considered for allocation proportionately in the Mutual Fund Portion. After completing proportionate allocation to Mutual Funds for an amount of upto 68,750 Equity Shares (the Mutual Fund Portion), the remaining demand by Mutual Funds, if any, shall then be considered for allocation proportionately, together with Bids by other QIBs, in the remainder of the QIB Portion (i.e. after excluding the Mutual Fund Portion). For the method of allocation in the QIB Portion please see the paragraph titled "Illustration of Allotment to QIBs" appearing below. If the valid Bids by Mutual Funds is for less than 68,750 Equity Shares, the balance Equity Shares available for allocation in the Mutual Fund Portion will first be added to the QIB Portion and allocated proportionately to the QIB Bidders. For the purposes of this paragraph it has been assumed that the QIB Portion for the purposes of the Issue amounts to 50% of the Issue size, i.e. 1,375,000 Equity Shares.
- Allotment shall be undertaken in the following manner:
 - (a) In the first instance allocation to Mutual Funds for 5% of the QIB Portion shall be determined as follows:
 - (i) In the event that Mutual Fund Bids exceeds 5% of the QIB Portion, allocation to Mutual Funds shall be done on a proportionate basis for up to 5% of the QIB Portion.
 - (ii) In the event that the aggregate demand from Mutual Funds is less than 5% of the QIB Portion then all Mutual Funds shall get full allotment to the extent of valid bids received above the Issue Price.

- (iii) Equity Shares remaining unsubscribed, if any, not allocated to Mutual Funds shall be available to all QIB Bidders as set out in (b) below;
- (b) In the second instance allocation to all QIBs shall be determined as follows:
 - (i) In the event that the oversubscription in the QIB Portion, all QIB Bidders who have submitted Bids above the Issue Price shall be allotted Equity Shares on a proportionate basis for up to 95% of the QIB Portion.
 - (ii) Mutual Funds, who have received allocation as per (a) above, for less than the number of Equity Shares Bid for by them, are eligible to receive Equity Shares on a proportionate basis along with other QIB Bidders.
 - (iii) Under-subscription below 5% of the QIB Portion, if any, from Mutual Funds, would be included for allocation to the remaining QIB Bidders on a proportionate basis.
- Except for any shares allocated to QIB Bidders due to undersubscription in the Retail Portion and/or Non Institutional Portion, the aggregate allocation to QIB Bidders shall be made on a proportionate basis of at least 1,375,000 Equity Shares. For the method of proportionate basis of allocation refer below.

Method of Proportionate basis of allocation in the Issue

Bidders will be categorized according to the number of Equity Shares applied for by them.

- (a) The total number of Equity Shares to be allotted to each category as a whole shall be arrived at on a proportionate basis, which is the total number of Equity Shares applied for in that category (number of Bidders in the category multiplied by the number of Equity Shares applied for) multiplied by the inverse of the over-subscription ratio.
- (b) Number of Equity Shares to be allotted to the successful Bidders will be arrived at on a proportionate basis, which is total number of Equity Shares applied for by each Bidder in that category multiplied by the inverse of the over-subscription ratio.

In all Bids where the proportionate allotment is less than 10 Equity Shares per Bidder, the allotment shall be made as follows:

- Each successful Bidder shall be allotted a minimum of 10 Equity Shares; and
- The successful Bidders out of the total Bidders for a category shall be determined by draw of lots in a manner such that the total number of Equity Shares allotted in that category is equal to the number of Equity Shares calculated in accordance with (b) above.

If the proportionate allotment to a Bidder is a number that is more than 10 but is not a multiple of one (which is the market lot), the decimal would be rounded off to the higher whole number if that decimal is 0.5 or higher. If that number is lower than 0.5, it would be rounded off to the lower whole number. All Bidders in such categories would be allotted Equity Shares arrived at after such rounding off.

If the Equity Shares allocated on a proportionate basis to any category are more than the Equity Shares allotted to the Bidders in that category, the remaining Equity Shares available for allotment shall be first adjusted against any other category, where the allotted Equity Shares are not sufficient for proportionate allotment to the successful Bidders in that category. The balance Equity Shares, if any, remaining after such adjustment will be added to the category comprising Bidders applying for minimum number of Equity Shares. The basis of allocation on a proportionate basis shall be finalised in consultation with the Designated Stock Exchange.
