Integrated Gold Value Platform

Augmont Enterprises Limited is an integrated precious metals company engaged in bullion trading, gold and silver refining, manufacturing of gold and silver bars/coins, and digital gold solutions. The company operates across the entire precious metals value chain, catering to jewellers, bullion dealers, corporates and retail customers. Through its technology-enabled platform, Augmont Spot, the company provides real-time pricing, trading and delivery solutions, enabling transparent and efficient transactions in the bullion ecosystem.

The company follows a trading and value-added processing business model, generating revenue through procurement, refining, manufacturing and sale of precious metal products. Its business performance is driven by transaction volumes, customer additions, inventory management efficiency and movements in precious metal demand. Augmont's integrated operations across sourcing, refining, trading and distribution help strengthen supply chain efficiency and build trust among customers.

Augmont has developed a strong presence in the organised bullion market with a wide network of jewellers, dealers and retail customers across India. Its technology platform enables seamless access to live market prices, digital transactions and efficient settlement, helping modernise traditional bullion trading practices. The company is positioned to benefit from increasing formalisation of the gold ecosystem, rising demand for organised precious metal platforms and growing adoption of digital gold investment solutions.

The IPO comprises a Fresh Issue of ₹620 crore and an Offer for Sale (OFS) of ₹205 crore by existing shareholders. The company intends to utilise ₹465 crore from the fresh issue proceeds towards funding future working capital requirements, including procurement, maintenance and scaling up of inventory, along with advance margin requirements for inventory procurement. Key strengths include its integrated precious metals ecosystem, established bullion network, refining capabilities, technology-driven platform and strong customer relationships. Key risks include exposure to gold price volatility, high working capital requirements, inventory management challenges and competition from traditional bullion players and digital gold platforms.
